CHEMISTAND DRUGGIST

For Retailer, Wholesaler and Manufacturer

A TOP-SELLER from the Cotter's range of products

RESEARCH ESTABLISHES THOMPSON'S SLIPPERY ELM FOOD IDEAL IN CASES OF STOMACH WEAKNESS, ULCERS, DIGESTIVE DISORDERS.

Large scale market research into the uses of Thompson's Slippery Elm Food establishes these facts. More and more people are finding it of particular benefit in cases of stomach disorders of all kinds, especially ulcers and some effects of anxiety neuroses.

It is easy to digest, and can usually be retained by the most delicate stomach when other foods are rejected.

But its value as a food beverage is more widespread. Thompson's Slippery Elm Food is a wonderfully nourishing restorative. People find a cupful taken mid-morning relieves fatigue; taken again at night it ensures restful sleep. Its sustaining properties are remarkable. No wonder it ranks as Potter's BIGGEST SELLING LINE.

Available in three varieties

PRICE MAINTENANCE

In the High Court on the 26th March, 1957, County Laboratories Limited, Macleans Limited and Harold F. Ritchie Limited, three of the Beecham group of companies, obtained an undertaking from J. Mindel Ltd. that the Defendants would not sell by retail any articles manufactured or distributed by the Plaintiffs below the current fixed retail selling price.

It is the policy of the Beecham group of companies to protect the prices at which their products may be sold to the public. This ensures fair and reasonable profit margins to the trade and gives the public a continuing assurance of high quality and good service at fair prices.

Oh, gentle-natured Al Borak!

realised. Its bright white crystals were known to the physician, Rhazes of Basra, well over a thousand years ago as "Baurak." The same word was applied to the fabulous, glittering Al Borak, a "flying horse" of Arabian legend. Since then, use and research have added household familiarity to an almost legendary name.

Boric acid, obtainable from borax, has become one of the safest and gentlest antiseptics known, for use in talcs, in dressings, in ointments and optical solutions, and it discourages the growth of bacteria and fungi. Medical science has constantly expanded and improved on the traditional uses of the past two hundred years. Today, boric acid is especially recommended for soothing and detergent mouth-wash solutions² and tablets³ and emollient gum lotions.⁴

Borax was named long before its true pharmaceutical value was

1. Beckmann's History of Inventions, IV 529, 1814.

Properly applied, boric acid will continue to maintain the high place it has held in therapeutics and cosmetic manufacture for many years.

- 2. Goodrich, H.P. & Way, G.L., 1940, British Medical Journal, 769.
- 3. Chemist & Druggist, 1947, No. 3510, 629.
- 4. Pharmaceutical Recipe Book, American Pharmaceutical Association, 1932.

Hundreds of thousands who were travel sick last year on land, sea and in the air, need never suffer that discomfort again

because this year you will be able to give

'SEA-LEGS'

12.5 mg. tablets meclozine dihydrochloride

for the prevention of travel sickness by land-sea-air

Here is the travel sickness remedy you can confidently recommend to *any* of your customers! Meclozine represents a real advance in the prevention of travel sickness on land, sea or in the air.

A more-than-seasonal line

In thousands of homes travel sickness is a year-round problem—the majority of sufferers are among children travelling daily to school, and adults journeying to and from their work. In millions more homes there is a vast demand for an effective remedy during the holiday months. SEA-LEGS will bring relief to countless sufferers throughout the country!

24-hour protection

SEA-LEGS will not cause dry mouth, blurred vision, or other unpleasant side-effects. They are completely safe for children of all ages (one tablet is the dose for children 1 to 12 years)—and one dose will give protection for 24 hours. Each attractive plastic dispenser case contains 16 tablets—eye-catching display outers and matching showcards are available. SEA-LEGS may be sold by pharmacists without restriction.

a new trump card - 28 aces high!

Why this card is a winner. The Kelly Grip is all set to get ahead in a very big way. Reason? The new bumper card which offers women a complete pin-up for just 6d! 28 grips for 6d.—twenty-eight strong, beautifully springy grips, with smooth, rounded ends for comfort. That's real value—the sort of value all women go for without fail.

Good marks for looks. And it's not only the value they'll like: complete with its Barbara Kelly study, this card is as pretty a decoy duck as ever drew a woman's eye to the counter.

Blowing the Kelly trumpet. The new giant card will be introduced in the national press, and in important magazine publications. The impact of frequent insertions is going to make women say 'Kelly grips please', when next they buy hair grips.

Your turn to play. The manufacturers have dealt you a trump card. There's plenty of profits in the kitty. It's up to you to collect your winnings. So stock up now with the Kelly Grip—the grip that's going to be in the news all over the country.

28 Card for 6d. 12 Card for 3d. by makers of the famous Witch Hair-pins.

a new 'Name for Nitrofurans'

The Nitrofurans have made great contributions to the control of many costly diseases: coccidiosis, fowl typhoid, pullorum disease (BWD), blackhead, salmonellosis, hexamitiasis, necrotic enteritis—the list grows longer every year. Their immense potentialities merit the backing of a world-wide research and development programme such as only a large-scale organisation can provide. This has now been arranged.

From 1st April 1957 A. J. White, Limited will be called SMITH KLINE & FRENCH LABORATORIES LTD.

The whole range of 'Nefco' and 'Neftin' products will in future be sold by Smith Kline & French Laboratories Ltd.

The change of Company name involves no change of staff or policy. But larger resources for research and development mean more and better Nitrofurans for Veterinary Medicine throughout the world.

Detensyl

Vegeto-Polyhormonic Hypotensor

The recognised treatment in conditions requiring the lowering of arterial tension

ETENSYL is another of the M.B.L. preparations which has been accepted by doctors in many countries. In various indications associated with blood pressure, regular administration restores normality. A small, periodic dosage is recommended for maintenance.

DETENSYL contains mistletoe, liver, pancreas and lung substances. More than a palliative, it re-educates the endocrine glands, allowing them to resume their regulation of the arterial tension.

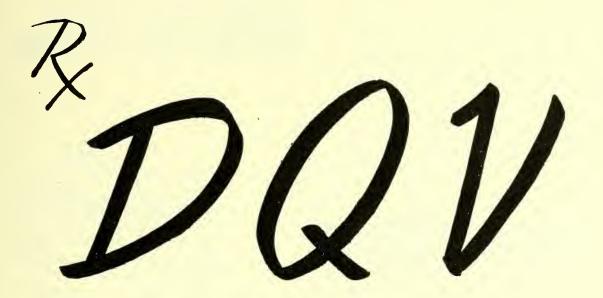

INDICATIONS

Conditions frequently associated with blood pressure, such as Menopausal Disturbances, Arteriosclerosis, Sclerosis of the Kidneys, Persistent Cephalalgia, Arthritis and Auditory and Ocular Troubles, respond to DETENSYL therapy and almost inevitably disappear with the lowering of arterial tension.

Pharmaceutical Services Costs

LOWER ONLY IN SCOTLAND IN 1957-58?

THE Civil Estimates for the year ending March 31, 1958, published on March 29, show that the pharmaceutical services under the National Health Service in England and Wales are expected to cost respectively £2,542,000 more and £250,000 more than in 1956–57. In Scotland the cost is expected to fall by £69,000. Because of the new prescription charges the net cost to the Exchequer for each country will fall as compared with last year. The figures for the three countries are summarised in the table below:—

ANALYSIS OF PHARMACEUTICAL SERVICES COSTS

ITEM	ENGLAND		WALES		SCOTLAND		
	Estimate 1957-58	Difference from	Estimate 1957-58	Difference from	Estimate 1957-58	Difference from	
(a) Pharmacists	£'000s	1956-57	£'000s	1956-57	£'000s	1956-57	
(i) Dispensing fees and		£'000s		£'000s		£'000s	
rota payments	13,568	1,156 less	1,046	82 less	1,528	0.5 less	
(ii) Cost of ingredients							
and containers						1	
allowance	35,949	2,921 more	2,752	264 more	3,798	55 · 5 less	
(iii) Allowance for over-							
heads and profit	8,631	743 more	661	67 more	904	14 less	
(b) Medical and dental							
practitioners	1,845	34 more	138	1 more	122	same	
(c) Health Centre services	_	_	_	_	8	0.5 more	
Gross total	59,993	2,542 more	4,597	250 more	6,360	69 Icss	
Less payments by patients	11,406	3,904 more	855	310 more	1,087	267 · 5 more	
Net total	48,587	1.362 less	3,742	60 less	5.273	337 less	

The general medical services will cost £55,978,000 in England (an increase of £1,168,000); £3,786,000 in Wales (an increase of £124,000); and £7,450,000 in Scotland (an increase of £123,000). The estimate for the National Health Service as a whole in England and Wales shows an increase of £19,864,490 to £490,607,365, and for Scotland an increase of £1,372,225 to £59,529,380. The cost in Great Britain is thus expected to be £550 millions, an increase of over £21 millions.

Hospital Costing

PUBLIC PHARMACISTS' STATEMENT

THE Guild of Public Pharmacists has issued a statement on hospital departmental costing. The statement points out that since August 1956 representations have been made to the Ministry of Health about the problems of that costing as applied to pharmaceutical departments, Points raised included: (a) The difficulties of costing large numbers of small issues: work for which some pharmaceutical knowledge was required; (b) staff shortages; and (c) comments from members taking part in trial schemes. As a result of the trial schemes, further advice has been issued to finance and pharmaceutical staffs in the form of "Information Notes." The

Guild urges chief pharmacists to ensure that they receive copies. Briefly, the advice is that detailed arrangements should be made locally and that, where possible, the minor user alone should be costed, the balance being determined by difference. Neither of the methods used in the trial scheme is suggested. The Guild, though not accepting the need for such costing, agrees with the suggestion of costing only the minor user. It disagrees with the Ministry's suggestion of sample periods of one month in every four. Unless there is some significant change in either prices or issues, the Guild considers that a figure once determined should be applicable for upwards of a year. A reasonable sample period is considered to be three weeks, one per month during three months.

Imports from Japan

OPEN GENERAL LICENCE AMENDMENTS

FOLLOWING the conclusion of the Anglo-Japanese trade payments arrangements (C. & D., March 9, p. 253), the Open General Licence is being amended on April 25. The effect of the amendments is that all goods (with a few exceptions) which may at present be imported without an individual licence if originating in and consigned from Western European and certain other countries, may also be imported if they originate in and are consigned from Japan, Twelve new quotas have been established for import from Japan, They include: Surgical and medical dressings (£20,000). Details of the licensing arrangements are given in Notice to Importers Nos. 813 and 814 issued by the Import Licensing Branch of the Board of Trade.

AMBASSADOR AT FACTORY: During a recent visit to the Speke factory of Evans Medical Supplies, Ltd., the Liberian Ambassador (Mr. Clarence L. Simpson) saw products assembled for shipment to Monrovia for the Liberian national public health service. With him in the picture are Messrs. M. J. Smith (overseas sales director), T. J. Garner (export manager), and A. A. Pavillard (Consul of Liberia in Liverpool).

Trade Effluents

ANALYTICAL CHEMISTS' DISCUSSIONS

THE formulation of standard methods of analysis for aqueous liquids of different degrees of impurity was considered at a recent meeting of the Western Section of the Society for Analytical Chemistry held in Bristol. The importance of the oxygen demand particularly in regard to trade effluents, and in relation to river pollution was emphasised. It was essentially a biochemical question since the ultimate purification of the organic matter was a biological process. Apart from the theoretical calculation which could be made of the ultimate oxygen demand from a knowledge of the organically combined elements present, three methods of assessing the oxygen demand of a trade effluent were described. They were absorption from acid potassium permanganate, absorption from acid boiling potassium dichromate, and were the tests recommended by the panel of the joint committee of the Association of British Chemical Manufacturers and Society for Analytical Chemistry. The second method was a new feature in British practice and received special attention as did also the manometric (or respirometric) procedure for biochemical oxygen demand determination.

Biological Consultants

ADVICE FOR INDUSTRY

THE Institute of Biology publishes a Directory of Biological Consultants which includes details of the fields covered by independent consultants in biology. The subjects include: Bacteriology; fungal spoilage; industrial microbiology; dairy bacteriology; microbiological assay; food hygiene; antiseptics; disinfectants; brewing; applied entomology; industrial and household pests; biological assay of insecticides; nutri-tion, both human and animal; toxic-ology; ecology and land use; parasitology; pollution of rivers; sewage disposal; decay of timbers; wild-life conservation. The Institute of Biology can help industrial firms and public bodies needing advice on other, more specialised subjects by finding suitably qualified biologists who are willing to give advice. Copies of the Directory of Consultants in Biology can be obtained from the General Secretary, Institute of Biology, 41 Queen's Gate, London,

Disinfectant Makers

OFFICERS AND COMMITTEE ELECTED

OFFICERS and executive committee of the British Disinfectant Manufacturers' Association elected at the annual meeting on March 26 were: Chairman, Mr. W. Mitchell (Hull Chemical Works, Ltd.); Vice-chairman, Mr. H. C. Askew (Reckitt & Colman, Ltd.); Treasurer, Mr. V. G. Gibbs (William Pearson, Ltd.); Executive committee, Messrs. R. G. Berchem (Jeyes' Sanitary Compounds Co., Ltd.), A. Ernest Berry (Milton Antiseptic, Ltd.), Sir Knowles Edge, Bart. (William Edge & Sons, Ltd.), Dr. N. H. Poynton Association elected at the annual meet(Wm. Butler & Co. (Bristol), Ltd.), Messrs. C. W. Richards (Imperial Chemical Industries, Ltd.), J. Moffat Scott (Cooper, McDougall & Robertson, Ltd.), S. L. Waide (Newton, Chambers & Co., Ltd.).

Awards for Merit

MEDALS FOR HOSPITAL PHARMACISTS

THE council of the Guild of Public Pharmacists has accepted an offer from Evans Medical Supplies, Ltd., Speke, Liverpool, to award annually a maximum of two gold medals to hospital pharmacists who have made outstanding contributions to the advancement of the professional practice of hospital pharmacy. Nomination of the re-cipients and responsibility for the conditions governing the selection are vested in the Guild's council. The awards are not conditional upon membership of the Guild. Regulations governing the award are in process of being drawn up by the council.

Public Pharmacists

NOMINATIONS FOR GUILD'S COUNCIL

LAST day for the receipt of nominations of candidates for the council of the Guild of Public Pharmacists is April 27. Motions for discussion at the annual meeting of the Guild which is being held at 36 York Place, Edinburgh, on May 25, must also reach the Guild secretary (Mr. S. Powlson, 105A Albe-marle Road, Beckenham, Kent) by April 27.

ALL chemist contractors in Scotland are being asked to provide information during April regarding the collection of charges on prescriptions. The information is being used to determine whether the present uncollected charges allowance is adequate

OVERSEAS NEWS RHODESIA AND NYASALAND

Drugs Inquiry

THE Rhodesian Government has ordered an inquiry into the cost of drugs THE Government has and chemists' services.

Imports of Poliomyelitis Vaccine

BECAUSE of a sharp rise in the incidence of poliomyelitis in the Federa-tion of Rhodesia and Nyasaland tion of Rhodesia and Nyasaland, British poliomyelitis vaccine is being allowed to be imported. Announcing that decision on March 20, the Federal Ministry of Health said that the weekly rate of notifications had increased from eight or ten during January and February to twenty-five. So far the main incidence has been among the population of Southern European Rhodesia.

UNITED STATES

No Counter Sales of Cortisone

An order prohibiting the sale without prescription of ointments and lotions containing hydrocortisone and hydrocortisone acetate has been issued by the United States Food and Drug Administration.

Disguised as Easter Eggs

EACH ounce wrapped in coloured metal foil to resemble an Easter egg, 3 oz. of pure heroin has been seized by narcotics agents in California. The heroin is alleged to have been bought for £3,500 in marked notes. The seller is being held on charges of illegal posses-

Increased Dispensing

In 1956 retail pharmacies in the United States dispensed 629 million prescriptions, a gain of 9 per cent. over the 1955 total of 577 million, according to the Medimetric Institute, New York. More than half the total increase occurred in the tranquilliser and hormone fields but, contrary to widely held impressions, tranquillisers were still outranked more than two to one by antibiotics, which accounted for more than 10 per cent, of the total in 1956. Consumption of tranquilliser drugs, the research agency believes, has not yet reached its peak.

JAPAN

Antibiotics and Food Preservation

THE Japanese Welfare Ministry is asking the World Health Organisation to ban the use of antibiotics in preserving food on the grounds that frequent use of those on fish and vegetables would destroy their value to human beings or cause fatal allergies.

GERMANY

Salk Vaccine Imports
THE Prime Ministers of the West
German States have decided to authorise the import of large amounts of the Salk poliomyelitis vaccine from the United States this spring. Enough will be imported to inoculate several hundred thousand children aged between two and three.

NEW ZEALAND

Drug Bill Rises

THE sharp increase in the social security pharmaceutical costs was referred to by the New Zealand Minister of Health (Mr. J. R. Hanan) when he addressed the biennial conference of the New Zealand Branch of the British Medical Association, recently the Medical Association, recently. He said that the individual doctor had a responsibility not only to his patient, but also to the taxpayer. The cost of drugs would, he said, exceed £2 a head of the population in 1957. In 1948 the total cost of pharmaceutical benefits was £1,558,000. In 1956 it was £4,039,000. **EGYPT**

Narcotics Ring Broken

WHILE the United Nations Emergency Force was deploying in Gaza and up to the demarcation line, members of to the demarcation line, memoers of the U.N. international force were in-strumental in uncovering a narcotics ring in Egypt. Several smugglers were captured and a large cache of opium was confiscated. The operation took place on March 9 in the Sinai desert and the Deir El Ballah areas, and involved a stratagem worked out by U.N.E.F. in co-operation with the Egyptian police from the El Kantara area. From reports it appears that about the beginning of March a U.N.E.F. officer was approached by a bedouin who offered to sell him

hashish, and also attempted to engage military personnel in the transport of narcotics from Sinai to Lower Egypt. During the first week of March, the purchase of a small amount of hashish by a U.N.E.F. officer was deliberately staged to gain the confidence of the smugglers, payment being made with marked Egyptian money. Later negotiations were completed with the smugglers for receipt of a consignment of narcotics at a designated point in the Sinai desert for transport by U.N.E.F. vehicles to other parts of Egypt. When contact was finally made with the principals in Sinai, they were captured and turned over to the Egyptian police; a sack of twelve parcels, each containing 1 kilo of pure opium, was confiscated. Later the same day other persons involved in the narcotics ring were captured in the Deir El Ballah area after a night raid involving an exchange of shots.

NEWS IN BRIEF

A ROYAL charter has been granted to the Institution of Chemical Engineers.

RATIFICATION is expected soon of an agreement whereby Co-operative pharmacists at every stage, will receive salary increases of $7\frac{1}{2}$ per cent., from April 1.

THE Meldola Medal of the Society of Maccabæans has been awarded by the Royal Institute of Chemistry to Dr. Thomas Summers West, Birmingham University.

A WEEK-END conference of the Apothecaries' Hall Dispensers' Association, was held recently at Shrewsbury, Salop. Arrangements are being made for a similar conference at Harrogate in 1958.

A NEW pharmacy department was officially opened at Solihull Hospital, Warwicks, on March 21, by the mayor and mayoress of Solihull. The premises were originally the dormitory of the former Solihull Institution.

"French Fortnight" (see C. & D., March 9, p. 260) was launched by the French Minister for Economic Affairs and the president, Union Française des Industries Exportairices, at a reception in London on April 1.

OFFICERS of the South London and Surrey Pharmacists' Golfing Society elected at the recent annual meeting were: President, Mr. A. Cottam; Vicepresident, Mr. J. L. Wrathall; Treasurer, Mr. G. G. Watt; Secretary, Mr. G. G. Jamieson, 3 High Street, South Norwood, London, S.E.25.

More than 100 additional workers will be required by Kork-N-Seal, Ltd., when the metallurgical part of the company's plant is transferred from Charlton, London, to Keirfield Works, Bridge of Allan, Stirlingshire, Scotland, in the near future. The company's London section will concentrate on plastics.

At the recent annual meeting of the Association of Glass Container Manufacturers, Mr. Alec W. Clark (managing director, Beatson, Clark & Co., Ltd.) was elected *President* and at the succeeding annual meeting of the National Joint Industrial Council for the glass container industry he was appointed *Chairman*.

TOPICAL REFLECTIONS

By Xrayser

Advances in Medicine

The lecture delivered to an evening meeting in Edinburgh by Mr. D. H. O. Gemmell (p. 357) indicates the impact that nuclear science is making on modern medicine and modern pharmacy. Mr. Gemmell focused attention on yet another branch of specialised drugs requiring specialised treatment. When one considers the rapidity of the changes which have taken place over the past ten or twenty years, the task of those charged with the formulation of an educational policy equal to modern requirements appears formidable indeed. I note that the meeting to which I refer is the fourth of the Edinburgh evening meetings for the session. I am at a loss to account for the fact that there appears to be a public for such meetings in Edinburgh, while London has given up its series of regular scientific (or other) meetings. What is the explanation? The differences between pharmacists in the two capitals are surely not so great that in one a keen interest in affairs pharmaceutical survives and thrives, while in the other it has atrophied. Is London prepared to accept the present situation?

The Problems

Education must always be a little ahead of requirements. The policy must be bold, yet must not soar too far into the realms of the problematical. It must be practical. It must take account of foreseeable needs, and it is in the forecasting of those needs that the chief difficulty lies. Revolutions in medical science and pharmaceutical technique have been so rapid in recent years that anticipation of future progress in those fields is impossible. But the future of pharmacy depends on its capacity to adapt itself quickly to any new situation. With regard to keeping the register "up to strength," there appears to be some doubt. The future will certainly see a reduction in the number of pharmacies acting as points of distribution. The less economic units are proving to be unsaleable, and are closing down, on a limited scale it is true, but a scale which is likely to increase. There is scope for the development of larger units, more adequately staffed, and more economic to run. Even if it is accepted that the number of names on the register is the optimum number, it does not appear to be vital that that strength should be distributed as at present.

Stocktaking

There are various ways in which the task of stocktaking may be tackled. More and more pharmacists are relying on the professional expert to undertake the task, and there are many advantages in having the priced and added sheets laid on one's desk. From the point of view of the busy man such a method is well worth the expense. If the method has a drawback at all, it is of the same nature as that experienced by the owner of a garden who employs a gardener. He no longer knows what he has in his garden, passing in and out with lttle regard for the contents. The keen amateur is always watching developments, and in time develops a personal interest in the weeds. Something of the same feeling enters into stocktaking. When the pharmacist struggles with a manual stocktaking, he finds out many facts which are of interest to him. He finds goods that should be put on display, and refreshes his memory in regard to the more obscure articles on shelves and in cupboards. He finds it increasingly difficult, though, to look at friends who have been coldshouldered for years and are neglected and despised. Tincture of kino, zinc sulphocarbolate, althea ointment, tincture of cimicifuga and oil of amber wear a reproachful look, and even dill water appears to be asking if babies no longer suffer from wind. All are acquaintances of long standing—and long standing looks like being their fate in the future. Unlike their modern counterparts, they had the merit of being inexpensive, and it may solace them to know that their period of active life of some of them was measured in centuries, whereas the word ephemeral rather than ethical might be more accurately applied to some of the new preparations—indeed, it might almost have been coined for the purpose.

IN PARLIAMENT

By a Member of the Press Gallery, House of Commons

SIR DAVID ECCLES (President of the Board of Trade) told Mr. E. FLETCHER on March 28 that the registrar of restrictive trading agreements had stated that about 1,200 agreements had been sent to him by the end of the first registration period on February 28. The agreements would be available for public inspection on April 15 on payment of one shilling. He could not say when the Restrictive Trade Practices Court would start functioning because there was still a lot of work to be done.

Weights and Measures Legislation

MR. F. J. ERROLL (Parliamentary Secretary to the Board of Trade) told MR. A. E. ORAM on March 28 that the proposals of the Hodgson committee on weights and measures would be introduced as legislation and soon as parliamentary time permitted.

Imports of Drugs from United States

SIR DAVID ECCLES (President of the Board of Trade) told MR. H. WILSON, in a written answer on March 28, that imports of drugs, medicines and medicinal preparations, excluding antibiotics, from the United States into Britain in 1956 were valued at £1·1 million. Those goods were not separately specified in the trade returns for 1951 but imports in that year were estimated to have been of the same order as in 1956.

Cost of Vaccines and Inoculations

MR. J. K. VAUGHAN-MORGAN (Parliamentary Secretary to the Ministry of Health) told MR. C. R. HOBSON, in a written answer on April 1, that the total amount paid by the Ministry of Health for vaccine lymph from July 1948 to March 1956, was £183,748. The corresponding figure for material for inoculations for diphtheria and for B.C.G. vaccine were respectively £170,215 and £13,473. Vaccines for immunisation against whooping-cough and tetanus were not supplied centrally. The cost of vaccines purchased direct by local health authorities or dispensed by chemists on prescriptions of general practitioners were not separately known.

Strontium in Children's Food

Mr. D. Vosper (Minister of Health) told Dr. B. Stross on April 1 that he understood that treated bone meal was used in very small quantities in some cereal foods mainly intended for infants. No measurements of the level of strontium 90 in cattle bones had been carried out in Britain, but there was evidence that the levels were comparable with those in milk. Watch was being kept on the matter, mainly in connection with the effect on milk. He was sure that the Medical Research Council would give its advice if necessary. Mr. Vosper told Dr. B. Stross, in a written answer on April 1, that he was advised that the best estimate that could be made was that the incidence of bone cancer in the general population was likely to be inappreciable if the level of strontium 90 in human bone was below 100 units. Observations in Britain showed that the present level was, on the average, less than one unit.

Prescription Costs

MR. DENNIS VOSPER (Minister of Health) told Mr. A. BLENKINSOP on April 1 that the average cost per prescription in January was about 5s. 6½d. That was about the same as in December 1956 and about fivepence higher than in November 1956. An accurate figure for February was not yet available, but from a sample it was estimated that the average cost was about a penny more than in January. He was prepared to consider almost any proposal for some form of further independent check upon the value of new drugs. As far as the price of prescriptions was concerned, he had not yet received the detailed analysis of prescriptions for December 1956. That would be rather important. Mr. G. Nicholson asked the Minister if he was aware that the medical training of doctors included absolutely nothing to make them cost conscious; did he not think that efforts should be made to inculcate in the medical profession some consideration of the cost of prescriptions? Mr. Vosper: Yes. That is why Mr. Turton decided to set up a committee to examine the whole question of prescribing. The committee would, he hoped, start work very shortly.

The Customs Duties (Dumping and Subsidies) Bill was read a third time in the House of Lords on March 28 and passed.

LEGAL REPORTS

Drove Under Influence of Drugs

AT Hendon magistrates' court recently, Mrs. Betty Humbert was fined £10 and disqualified from driving for twelve months for driving a car while under the influence of drugs. It was stated that, in a hurry to see her nine-year-old child in hospital, she left her home without lunch but after taking sodium Amytal and a sedative for sinus trouble. There was no suggestion that she had taken anything to drink, and the drugs had been properly taken under medical supervision.

Addicted to Pethidine

At Hastings magistrates' court recently, a nursing sister at a St. Leonards nursing home pleaded guilty to unlawfully procuring pethidine on or about January 29 and 31. The sister (Miss M. F. Cox) asked for similar offences committed on various occasions between November 1, 1956, and January 17, 1957, to be taken into consideration. A police superintendent said that Sister Cox had worked at the nursing home for twenty-eight years. Some years ago she contracted tuberculosis in a leg and was given pethidine to relieve the pain. At that time pethidine was not registered as a Dangerous Drug. The court placed her on probation for three years on condition that she let herself be put under medical supervision for one year.

"Almost as Technical as Can Be"

BENJAMIN (Chemists), Ltd., 190 Stoke Newington High Street, London, N.16, pleaded guilty at North London magistrates' court on April 1 to keeping open their shop later than 1 p.m. on January 24 (the weekly half-holiday). Solicitor for the London County Council said that an assistant was seen to serve a customer with a tin of talcum powder. Defending counsel said that what happened was that the customer had bought a tin of talcum powder earlier in the day; she had bought it for someone else and later brought it back. The shop was properly open for the making up of prescriptions and the assistant thought there was no harm in changing the tin for another of exactly the same price. The magistrate said: "The hypothetical visitor from Mars might be hard put to it to see where the harm was. This is almost as technical an offence as can be." The company was granted an absolute discharge on payment of 10s. 6d. costs.

COMPANY NEWS

SOLARTRON RESEARCH AND DEVELOPMENT, LTD.—Mr. Reginald Catherall has been appointed a director.

GLAXO LABORATORIES, LTD. — An interim dividend on the Ordinary stock of 5 per cent, for the year ending June 30, is declared. A progress report on the first half-year's trading will be posted to stockholders in a few days,

STEVENSON & HOWELL, LTD.—Mr. Vernon J. Tilley, F.R.I.C. (chairman, managing director and chief chemist of the company) is retiring on April 12 from his position as managing director and from the board. His services will continue to be available in an advisory capacity. Mr. Tilley has been with the company for forty-eight years and has been a member of the board for forty years. He will be succeeded by Mr. Arthur J. Stevenson, a son of the joint founder of the business, who has been for many years a senior executive and director of the company.

New Companies

P.C. = Private Company; R.O. = Registered Office

JOHN McDOWELL, LTD. (P.C.).—
Registered in Belfast. Capital £5,000.
To acquire the business of John McDowell carried on at 335 Donegall Road, Belfast. Subscribers: Louisa M. McDowell and Rev. Andrew P. McComb. The first directors are not named.

SMITH & NEPHEW PHARMA-CEUTICALS, LTD. (P.C.).—Capital £50,000. To carry on the business of manufacturers of and dealers in chemicals, gases, drugs, medicines, etc. Directors: L. F. Long (chairman), Dr. R. Powell (managing director), D. E. Seymour and N. P. Newton. R.O.: Bessemer Road, Welwyn Garden City, Herts

ASSOCIATED CHEMISTS (BIR-MINGHAM), LTD. (P.C.). — Registered February 7. Capital £15,000. To carry on the business of wholesale and retail chemists, opticians, chiropodists, druggists, etc. Directors: Douglas G.

Beck, M.P.S. (a director, W. Beck & Sons, Ltd.), governing director and chairman, Alfred H. Moseley, M.P.S., Gerald H. Walker, M.P.S. (a director, G. H. Walker (Chemists), Ltd.), Frederick J. Reynolds, M.P.S. (a director, G. Knowles (Chemists), Ltd.), Lewis H. Teare, M.P.S. (a director, W. W. Adams, Ltd.), Gordon N. W. Buckingham, M.P.S., William Pickering, M.P.S., Frederick Wale, M.P.S., and Douglas J. Crawford, M.P.S. Secretary: A. H. Moseley. R.O.: 1116 Coventry Road, Hay Mills, Birmingham, 25.

BUSINESS CHANGES

LONDON CO-OPERATIVE CHEMISTS, LTD., have opened a pharmacy at 111 Fencepiece Road, Barkingside, Essex.

MR. J. H. WILSON, M.P.S., has acquired the pharmacy of Mrs. M. K. Wadham, M.P.S., 29 Baker Street, Weston-super-Mare, Somerset.

Appointments

MR. E. W. K. HEWITT has been appointed sales manager of British Cod Liver Oils, Ltd., Hull. He takes over responsibility for marketing, it is claimed, about half the world's total supply of cod - liver oil.

THOMAS KERFOOT & CO., LTD., Vale of Bardsley, Lancs, have appointed Mr. M. A. Roberts to their medical representative staff in London.

DISTILLERS CO. (BIOCHEMICALS), LTD., The Broadway, London, S.W.19, have appointed Mr. R. Levin, F.P.S., manager of their technical information department.

PFIZER, LTD., Folkestone, Kent, have appointed Mr. G. D. Rosen, B.Sc., Ph.D., F.R.I.C., as nutritional adviser. The post is newly created and the appointment takes effect on April 29.

BRAND & CO., LTD., Mayfair Works, London, S.W.8, have appointed Mr. S. A. Wrightson (representative in the Nottingham-Derby district) their Midlands area manager. He succeeds Mr. M. Granger who has been transferred to their head office as assistant home sales manager.

EDWARD TAYLOR, LTD., Monton, Eccles, Lancs, have appointed Mr. P. A. Harden, Viewfield, High Banton, Kilsyth, Glasgow, their Scottish manager, and Mr. S. Y. Scott, 6 Montpelier Terrace, Edinburgh, 10, their representative in South-east Scotland and North-east England.

ARMOUR LABORATORIES, Hampden Park, Eastbourne, Sussex, have appointed the following representatives for their pharmaceutical products: Miss E. G. Carson, North and East London and Essex; Mr. W. Hurst, South Lancashire, Cheshire, Shropshire, North Wales; Miss H. McCarron, B.Sc. (Pharm), F.P.S., Oxfordshire, Bucking-

hamshire, Berkshire, Surrey; Mr. J.W. Mitchell, West and North-west London, Middlesex; Mr. A. J. Parnall, South Wales, Herefordshire, Gloucestershire, Wiltshire; Mr. H. W. Pilkington, Northumberland, Cumberland, Westmorland, Durham, North Yorkshire; Miss S. M. Parrington, North Lancashire, West Yorkshire. Messrs. P. J. Walsh and H. L. Kendall are to cover East Scotland and Western Scotland respectively, their products to include surgical ligatures and sutures. Mr. R. A. Hill, S.R.N., is to cover Wales, Midlands and Eastern Counties for the company's ligatures and sutures only.

BIRTH

TAYLOR. — At Simpson Memorial Maternity Pavilion, Edinburgh, on March 24, to Ena, wife of Thomas Earl Taylor, M.P.S., 53 High Street, Cockenzie, East Lothian, a son.

MARRIAGES

RICHARDSON—ARTHUR.—At the Congregational Church, Ickenham, Middlesex, on March 30, Audrey Christine Arthur, M.P.S., to Kenneth A. Richardson.

BOWMAN—GREATOREX.—At St. James's Church, Enfield Highway, Enfield, Middlesex, on March 23, Arnold Harold Bowman, M.P.S., 144 South Lodge Drive, Southgate, London, N.14, to Jean Maria Greatorex, 33 Bowood Road, Enfield Highway.

DEATHS

ALCOCK. — On March 19, Mr. Alfred Allison Alcock, M.P.S., 44 Highfield Drive, South Shields, co. Durham, aged sixty-five. Mr. Alcock was superintendent and a director of Alcock (Dispensing Chemists), Ltd., South Shields,

JONES. — On March 3, Mr. Idris Lloyd Jones, M.P.S., Oakfield, Heenan Road, Old Colwyn, Denbighs, aged sixty-seven Mr. Jones was in business at The Pharmacy, Trawsfynydd, Merioneth.

JONES.—On March 31, Mr. William Miall Jones, F.P.S., Glascoed, Penparke, Aberystwyth, Cardigans, aged eighty-five. Before he retired Mr. Jones had had a pharmacy in the town for thirty-eight years. He was a recognised authority on field botany and ornithology. He was a former president of Aberystwyth chamber of trade.

McCartney. — At his home, 54 Lodge Road, Coleraine, co. Londonderry, on March 23, Mr. Robert Freeborn McCartney, M.P.S.N.I., aged eighty-six. Mr. McCartney, who carried on business at The Diamond, Coleraine, was one of the oldest members of the Pharmaceutical Society of Northern Ireland. He had been a leading figure in the public and business life of Coleraine for more than half a century. He was a former chairman of the urban council and was twice mayor of the borough.

OAKLEY. — On March 17, Mr. Frank Oakley, M.P.S., 90 Three Elms Road, Hereford. Mr. Oakley qualified in 1903.

SAGE. — On March 20, Mr. Ernest Sage, F.P.S., Inveravon, Station Road, Verwood, Dorset, aged sixty-six.

SLAVEN. — On March 23, Mr. James Slaven, M.P.S., 16 Waverley Drive, Rutherglen, Glasgow, aged fifty-eight. Mr. Slaven was in business at 317 Nuneaton Street, Glasgow, S.E.

TAGGART. — At his home, 10 Cushendall Road, Ballymena, co. Antrim, suddenly, on March 21, Mr. Alexander Taggart, M.P.S.N.I. Mr. Taggart qualified in Dublin as a registered druggist in 1907, and qualified as a pharmaceutical chemist in Northern Ireland in 1926. He had carried on business in Ballymena for over forty years.

PERSONALITIES

MR. G. WOODFINE, M.P.S., Bexhill-on-Sea, Sussex, addressed Bexhill Citizens at their monthly luncheon recently.

MR. E. HILL, M.P.S., has been reappointed to Liverpool Regional Hospital Board for three years. Mr. Hill is a director of Hill's Balsam, Ltd.

MR. H. HOLLAND, M.P.S., has been elected to the committee of Bognor Regis West End Traders' Association which has been revived after a lapse of many years.

MR. H. ROLLETT, M.P.S., Wrentham, who is one of the oldest chemists in Suffolk, where he took over a business in 1892 after moving from Lincolnshire, has resigned office as a warden at St. Nicholas' Parish Church on account of failing health. Mr. Rollett, who qualified in 1890, was appointed people's warden in 1901 and has carried on in that capacity or as Rector's warden, his recent office, ever since. For many years he was also treasurer of the Parochial Church Council. The Council has placed on record its appreciation of the outstanding services rendered by Mr. Rollett to church and parish. When he completed fifty years as warden in 1951 and received a parish presentation, the Bishop of St. Edmundsbury and Ipswich wrote that his service was unique in the diocese

MR. A. E. SMITH (a director since January 1955 of Smith & Nephew, Ltd., Welwyn

Ltd.. Welwyn Garden City) is relinquishing the position in order to join the board of the associate company Smith & Nephew Textiles, Ltd., Lancashire. He will be responsible for the marketing of the company's complete range of surgical dressings,

both at home and overseas. At Welwyn Mr. Smith had command of adminstration, public relations and packaging. He was with Herts Pharmaceuticals, Ltd., before that company joined the Smith & Nephew group in 1951, managing the Indian branch until 1946 and in that year forming in Toronto the Canadian company, of which he was later appointed managing director. He returned to England in 1954.

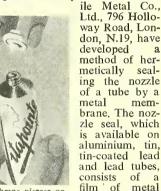

PACKAGING NOTES

Now in Nylon.—Fibrenyle, Ltd., 157 Dukes Road, London, W.3, state that they are now able to produce in nylon their Skylon range of bottles and jars

"on a production basis." Clear and light, and of attractive appearance, the containers present no problems of sterilisation.

A Membrane Seal.—For prevention of seepage from collapsible tubes Flex-

mem-

consists of a film of metal The membrane-piercer on approxi-mately threethe Polyflex cap.

thousandths of an inch thick which is integral with the metal of the tube and seals the nozzle completely, preventing evaporation or scepage. The tube is fitted with a Polyflex polythene cap with a spike on the top. When the cop is removed the membrane seal is pierced by reversing the cap and press-ing the spike into the membrane. To stop seepage at the folded end of the tube, the company offers a wide range of sealing compounds of which latex is claimed to be the most popular, although wax and vinyl adhesives may also be used.

TRADE NOTES

Contents Doubled. — Keldon, Ltd. (agents for Optrex, Ltd.), Wadsworth Road, Perivale, Middlesex, have increased the number of Optrex eye compresses in the pack from six to twelve.

Discontinued.—PARKE, DAVIS & Co., LTD., Staines Road, Hounslow, Middlesex, have discontinued diphtheria-pertussis prophylactic (W.D.P., green label). Stocks are exhausted.—British Schering, Ltd., 229 Kensington High Street, London, W.8, announce that their stocks of Iviron are exhausted and the product is discontinued. Stocks in retailers' hands should be returned for credit.

"Styled" Nail Trimmer.—The Trimrite nail clipper distributed through wholesalers by D. Harris & Co., Ltd., 73 Brewer Street, London, W.1, has "American" styling, and is claimed the

best known nail trimmer.

Sole U.K. Distributors. — George Spencer & Son, Ltd., Kynance Place, Gloucester Road, London, S.W.7, have been appointed sole distributors in the United Kingdom of the products of John H. Breck, Inc., manufacturing chemists, Springfield, Massachusetts, U.S.A. The products include the Breck shampoo for dry, normal or oily hair.

A Charge for Carriage. — Vitamins, Ltd., Upper Mall, London, W.6. announce that, from April 8, and owing to increased transport costs, all orders under £5 (invoice value) are being charged carriage. Orders for Bemax charged carriage. qualifying for quantity terms (minimum three doz. 3s. size or equivalent) are still being sent carriage free.

Policy. -Fixed Price attention to the outcome of their proceedings against a price-cutting retailer (see C. & D., March 30, p. 343) County Laboratories, Ltd., Macleans, Ltd., and Harold F. Ritchie, Ltd., point out that it is the policy of the out that it is the policy of the Beecham group of companies to protect the prices at which their products may be sold to the public.

For Piglet Anæmia.—Rapidly increasing demand is reported by the Crookes Laboratories, Ltd., Park Royal, London, N.W.10, for their two-shot Ferrovet (for the treatment of piglet anæmia). Messrs. Crookes advise pharmacists to be prepared with stocks because the treatment, whether prophylactic or curative, has to be commenced during the first seven days of the piglet's life. Ferrovet is available in a 30-mil rubbercapped vial.

Vaccine Change. — Evans Medical Supplies, Ltd., Speke, Liverpool, 19, have deleted from their list pulpy kidney vaccine, B.Vet.C. It has been replaced by improved pulpy kidney vac-cine (A.P.T.), a preparation of high antigenicity developed to reduce to a minimum the number of sheep failing to become immune. The greater potency is achieved by absorbing the antigen from a germ-free culture filtrate on to aluminium phosphate and concentrating, and by trypsin treatment of the filtrate.

Bonus Offers

JOHN BELL, HILLS & LUCAS, LTD., Worsley Bridge Road, London, S.E.26. John Bell's tonic phosphates. Thirteen to doz. on minimum three doz. assorted sizes. Till May 31.

BRITISH PRODUCTS SANMEX CO., LTD., Rutherglen, Scotland. San-Mex per-fumed disinfectant spray. San-Mex concentrated perfume disinfectant refill. 5 per cent, on bonus parcel of three doz. either product or mixture of both. Until

W. B. CARTWRIGHT, LTD., Rawdon, Leeds. Moorland indigestion tablets. Thirteen to doz, on direct orders during May.

C. & G. KEARSLEY, LTD., 71 Dartmouth Road, London, S.E.23. Kearsley's Widow Welch's pills. Thirteen to

MEGGESON & Co., LTD., London, S.E.16. Meggeson glycerin and black-currant pastilles; glycerin, lemon and honey pastilles; or Gee's linctus pas-tilles. One doz. tins with each order value £10.

SCOTT & TURNER, LTD., Andrews House, Newcastle-on-Tyne, 1. Perminex BHC or DDT insecticide, 5 per cent. on all orders received by end of May.

SMITH & NEPHEW, LTD., Welwyn Garden City, Herts. Elastoplast. Details mailed to chemists. Leukoplast also qualifies for bonus.

MANUFACTURERS' ACTIVITIES

Increased Sales .-- At the end of the twenty-fifth day in the annual spring sales competition of the chemicals divisions trade sales department of Newton, Chambers & Co., Ltd., Shef-field, sales were 25.3 per cent. above those in the same period in 1956.

Advertising Award.—For "the most progressive direct mail campaign of 1956" Geigy Pharmaceutical Co., Ltd., Roundthorn Estate, Wythenshawe, Manabeter 22 hours were the Chal-Roundthorn Estate, Wythenshawe, Manchester, 23, have won the Chad-

AWARD TO PHARMACEUTICAL MANU-FACTURER: Sir Miles Thomas, D.F.C., presents to Mr. R. S. Newton (publicity manager, Geigy Pharmaceutical Co., Ltd., Manchester), the Chadwick cup for mail-order advertising of Desogen

wick cup of the British Direct Mail Advertising Association. The presentation luncheon to the company on March 28 was presided over by Sir Miles Thomas (chairman, Monsanto Chemicals, Ltd.). The prize-winning campaign was for Desogen lozenges.

Middle East Sales Up. — Allen & Hanburys, Ltd., London, report that despite political setbacks which denied them the Egyptian market, their sales to the Middle East at present are breaking all previous records by a substantial margin. In addition to the large volume of routine orders, profitable contracts have recently been secured to the value of over £300,000 for hospital equipment and pharma-ceuticals. The company attribute the position to their policy of personal representation commenced in 1946, and aimed at fostering trade with certain countries whose post-war evolution has been a significant feature of economic progress in the Middle East.

INFORMATION WANTED

BUAKOLADINE Autolysin Bagg's electuary cough mixture Apis Engineering & Research Co., Ltd. (present address) Dr. Lalor's PHOSPHODYNE Hill's bronchial balsam

NEW PRODUCTS AND PACKS

Novobiocin Syrup.—Upjohn of England, Ltd., Fleming Way, Crawley, Sussex, announce the availability of a 2-fl.-oz. bottle of Albamycin (novobiocin) syrup. Each 5 c.c. contains 125 mgm. of the antibiotic.

Insecticidal Aerosol.—Thornton & Ross, Ltd., Linthwaite, Huddersfield, are marketing an insecticidal aerosol, Jertox. The product has a smart red, white, black and pale blue, white capped container and is sent out in counter display outer holding six aerosols. The product contains DDT, BHC, dieldrin and pyrethrins.

A Branded Prednisolone. — Ciba Laboratories, Ltd., Horsham, Sussex, are marketing, under the name Ultracorten-H, their own brand of prednisolone, the hydrocortisone derivative that is currently being used in inflammatory and allergic conditions. The product is issued in containers of twenty-five, 100 and 500 1-mgm. or 5-mgm. tablets.

Cetrimide Cream and Silk Suture. — Two new specialities have been introduced by Cuxson, Gerrard & Co., Ltd., Oldbury, Birmingham. Cetrimide cream, containing 0.5 per cent. w/w of cetrimide, B.P., is issued in a 50-gm. cartoned tube. Merchant shipping medical scale, 1953, Sanisuture comprises a No. 10 half-curved cuttingedge eyed needle on 18 inches of white braided silk No. 4.

New Strength and New Forms. — Glaxo Laboratories, Ltd., Greenford, Middlesex, have introduced Ef-Cortelan eye ointment, 0·5 per cent., in tube of 3 gm., and two new forms of Diphenatil (additional to the uncoated 100-mgm. tablets): 100-mgm. "repeat action" tablets (50 mgm. in coating and 50 mgm. in core) in bottles of twenty-five and 250; and Diphenatil with phenobarbitone tablets (100 mgm. diphemanil methylsulphate, 16 mgm. (½ grain) phenobarbitone) in bottles of fifty and 500.

Piperazine Dimaleate.—Pharmaceutical Specialities (May & Baker), Ltd., Dagenham, Essex, announce the introduction of Stemetil brand 1-[3-(3-chloro-10-phenothiazinyl)propyl] - 4 methyl-piperazine dimaleate. Administered orally or as suppositories, Stemetil is claimed valuable in the symptomatic management of migraine and related conditions; Ménière's syndrome and other labyrinthine disorders; giddiness of other origins; and vomiting. It is presented in containers of twenty-five and 250 5-mgm. tablets and in boxes of five 25-mgm. suppositories. The company consider that sale of the product should be restricted in the same way as Largactil.

Whooping-cough Medication. — Hommel Pharmaceuticals, 121 Norwood Road, London, S.E.24, announce the introduction of Pertix, a specially formulated preparation intended for the relief of whooping cough, especially in eliminating or alleviating the necrotising effect of the Shwartzman phenomenon on the laryngeal mucosa. The active contents of Pertix are diphosphoric acid ester of menaphthone; isoniazid; and 2-diethylaminoethyl-β-

PACK AND SHOW-MATTER DESIGNED TOGETHER: The containers of Secto fly spray and Astral air freshener, new products of the Secto Co., Ltd., were designed together with the show material with striking effect. The showcards may be obtained from Cupal, Ltd., Blackburn.

phenyl-butyrate citrate. The preparation is subject to the Therapeutic Substances Act and is available on prescription only. A liquid, it is presented in bottles of 125 and 250 mils,

Rose Talcum.—A new addition to the range of talcum powders available from Cussons, Sons & Co., Ltd., 84 Brook Street, London, W.1, is "damask rose," which has "a very distinctive perfume... easily associated with the flower it represents." The pack is as illustrated.

Eye-catching Hair-grip Pack.—The new pack of Kelly hair grips carries twenty-eight grips with smooth rounded ends on a card beside a head and shoulders of the stage and television personality Barbara Kelly. The makers are Whitecroft Pin Manufacturing Co., Ltd., Whitecroft, Gloucester.

Shampoo in Clear Sachet. — Evan Williams Co., Ltd., Aintree Road, Perivale, Middlesex, are marketing a new liquid shampoo, Hi-Glo ("with miracle Dyroxin") in clear sachet, three doz. to a display carton. The company's liquid lanolin shampoo is eventually being withdrawn, and credit is being given for all paper sachets of the shampoo returned with orders for Hi-Glo received in April.

Scissors in Quick-service Display.— Alfred Franks & Bartlett Co., Ltd., 226 Gray's Inn Road, London, W.C.1, offer a range of hot-forged, chromiumplated scissors each visible in a dust-protected transparent-fronted counter display case. Each pair has its own transparent sheath and is mounted on a card indicating the variety (there are ten, including toe-nail, nurses, pocket, straight and ben nail and cuticle), and the case contains six pairs of each.

Lightweight Nylon Stockings. — E. Sallis, Ltd., Vernon Works, Basford, Nottingham, are marketing a new Eesiness product: Vernon lightweight nylon elastic yarn surgical stockings, N.H.S. The Vernon stockings are available with closed toes in 8½, 9, 9½, 10 and 10½-in. foot sizes, and with open toes in small, medium and large sizes. The closed-toe type may be worn with or without an over-stocking. Each pair is packed in a transparent tissue envelope and the outer contains six pairs.

Hair Beauty Buckle. — A Continental fashion that is invading Britain is the hair beauty buckle. To meet the demand, Bellino Novelties, 13 Boot Street, London, N.1, are marketing the Bellino buckle in a range of several styles and in a number of pastel shades and tortoiseshell, each with lustre finish. The buckles are individually carded. Each is in two parts, the one essentially an open rectangle or oval, and the other a wide "pin," which is inserted between hair and buckle.

Two New Colognes.—Molyneux et Cie (Design and Perfumes), Ltd., 1 Berkeley Square, London, W.1, are launching in April two new Colognes (below). *Trois Couronnes* is a classical Cologne, "the sophisticated bouquet of which will be a delight to all who use it."

Packed in a fluted bottle with gold cap it is enclosed in a white carton embossed with three gold crowns. Alli-"a ance. ance, "a true French lavender," is also in a fluted bottle but with white cap, and is packed in a white carton with tricolour motif. Alliance is marketed in bottles of two sizes.

SYMPOSIUM ON 5-HYDROXYTRYPTAMINE

Assessing its physiological importance

TO help in the assessment of the physiological importance of 5-hydroxytryparmine (HT or serotonin, was the object of a symposium on the substance held in the Wellsome Building Euston Road. Lopdon, on April 1 and 1

The symposium was under the chairmarship of Sir Charles Harington, F.R.S. Litector, National Institute for Medical Research

Wide Discriberion

Die, H. O. I. Coultier said than S-mythroxytryoptamine had a high amily varied inclinated and stated a high amily varied inclinational activity. It had a wide but local distribution. After dealing with methods of detecting, identifying and estimating the substance. Dr. Collier described its distribution in living species ranging from verrecrases to plants. The ability to toroduse HT, he said, seemed to have developed as the octation demanded and it appeared to have some survival value. These was evidence that it was responsible for some of the paintuless of venous in which it appeared in high concentration. It had been found that dook leaves, widely used to allevante nettle stings, potently antagonised HT, while only slightly antagonising historian and aretylcholine, in glands in the neck of the giant toad HT could attacker. Its presence in the sains of other animals would have the same effect. It might be the "poison" in the salivary plands of exphallopoia. I microgan, of HT could cause spasm of the material daw A general search for HT in the stinging apparatus of plants and animals would probably be rewarding. It was likely that HT secreted by the muscost of the gur was absorbed and reached fite network mechanism of the gur. I mgm. per kilo significantly intreased the number of defections in mice. Was HT nature's remedy for constitution!

Dr. G. P. Lewis discussed the localiscales of HT in the mast relia of the

Dw. G. B. Wast said that only bly per cant of HT in skin resided in the mast cells. He considered that most of the HT was not present in the mast cells although most of the histamine was.

Du. I. Paus. United States, suggested

Die I Fage. United States, suggested that the report of the symposium should be published in what the New Torker called the Torker trained in what the New Torker called the Torker trained in the Torker called the Torker trained in the New Torker called the Torker trained to the work the Erinain had done on HT. The subscance showed manical cardiac schimalation and to usually arred as a construction on the pulmonary pascular heal in was hard to say whether HT was a pressor to depressor agent, Aminais and human beings could show pressor and impressor response to the subscance. Antifixation of the response to HT, are asset whether one was fuscibled in saying that second that its very pressor impressor impressor that its very pressor impressor indicated that it must have a function in the mornal format being and suggested that its very pressor impressor in was function in the mornal function of the subscance indicated that it must have a function in was function in the mornal function of the subscance indicated that it must be a function of the subscance indicated that it must be a function of the subscance indicated that it must be a function of the subscance indicated that it is not present that it is not present to the subscance indicated that it is not present of the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance indicated that it is not present to the subscance in the subscance indicated that it is not present to the subscance in the subsca

have some connection with hypotension. He suspected that the understanding of its physiological effects was still a long way off. Perhaps pharmacologists were too concerned with "large squires" of those substances. That was not how nature worked.

DR. MARY FICKFORD said that HT could not as a potent annihilment by preferential vasoconstriction. Was it a hormone designed for physiological control of renal function? Its anti-hilment effect was due to its effect on the vascular system as a whole. The kidney was less sensitive than certain other tissues. The anti-hilmento response could be different in the same animal

with the same dose and under the same conditions. The effect was different from that of vasopressin, which was a real homograph

DR. R. S. STACEY said that the platelets were the main transporters of HT. There was a slow release of HT from platelets in silicone-treated glassware. In unsiliconed glass a much more rapid release was obtained. Mechanical damage could cause release, Clotting could release HT from platelets. Reserving and other rauwolfia alkaloids could release HT from platelets. Was the binding mechanism blocked?

The symposium was organised jointly by the British Pharmacological Society, the Physiological Society, the Blochemical Society, the Association of Clinical Biochemists, and the fine chemicals group, Society of Chemical Industry.

ION-EXCHANGE RESINS

Applications to pharmacy

THE nature and properties of the ion exchange resins were dealt with by Dx. T. R. E. Kressman at the sixth scientific meeting of the session of the Society of Cosmetic Chemists of Great Britain held resently. The original ration exchange resins consisted of condensation products of polyphenois and formalderized, and the original anion exchange resins of condensation products of mephenylenetizamine and formalderized, and the original anion exchange resins of bighter capacity were developed later by incorporating more highly formsed groups and the modern ration exchange resins contained carbeavile acid and sulphomic acid groups leading to weakly and strongly acidic products respectively, while the anion exchange resins contained alightatic amino and quaternary ammonium groups giving weakly and strongly casic products.

The sulphomic resins were used where

ते यह त्रव्यातिक स्व देश्यातिक स्वयं त्र in solution for, say, hydrogen ions. The parterplic rasins siewai a lew 2252-यंतु के ब्रह्मारी रक्षे रहेरे स्टेम्बंटर हैय their lydrogen long could be exchanged रोत के अवस्था है होड़ के सरके अपे Had to best ever exist that The W sorth free across from solution and they would not take up amions in neutral or alkaline solution. The quaternary resident and entire resident महार पेर कार्यास्त्रका की पेर स्थितिकार इन्से देशका स्थानिक स्थानिक वर्षा देशक would exchange all amons in solution for hydroxide ions. They will also make ur such feeble anids as bonic acid. carour monide and phenois. Recently, rexins had been prepared by polymentsing unsummaned compounds like sup-rene and then attaching the appropriate groups to the polymer by suitable obstricted treatment. Those resins had injurer paparines and were more stable than the consensation resins. All ion endings resident were relegible and the position of equilibrium was determinai by the affiliate of the resin for the ions being exchanged A knowledge of those affinities was important as it ाँ पोजस्य शामितास्य एवडं मानुकारमध्य स्थापि स्वारोधिर पास पा स्वित्य स्वीर्धा रेपा स्थलियाहर reactions would proceed quantizatively and, indeed, which would proceed as all, All applications of ion exchange could be listed under the headings:

Complete removal of ions from solution: separation and concentration; substitution of ions in solution by other ions. The removal of electrolytes from sugar and givenin solutions, prepara-tion of water equivalent to distilled and conductivity water, the preparation of streptomytin, the separation of amino acids, and the preparation of salts and acids that totale not conveniently be prepared by other methods were examples of such application. Somewhat specialised applications were the use of the made of the salts and the form the resins in the form of the powders suspended in all-in-water emulsions as dependents, antiperspirate and as carriers for medicaments Dr. H. W. His-BOTT introduced a discussion on the blocking effect of large molecules on the grains of resin and Dr. W. MITCHELL referred to the inactivating effect of bacteria. Dr. Kressman replied to the points raised mentioning the use of non-louised sterilising agents such as formaldebyde to deal with bacsuch as formalized you to deal with cac-teria when necessary. Dr. A. W. Middleton referred to the application of the resins as esterifying catalysts and in reply Dr. Kressman said that for that outpose the resins should not be completely dried. The advantages of the resins in that connection were that they pooled as villy be separated from the they could easily be separated from the reaction mixtures they caused no that ning and this not give tise to polymer-isation where easily polymerised compounds were being esterified.

N.H.S. STATISTICS

In Northern Iserand during July 1956, 517,892 prescriptions [\$17,002 forms] were dispensed at a total cost of £154,553. Average cost per prescription was [1-026] During August [956, 553,579 prescriptions [324,209 forms] were dispensed at a total cost of £140,240. The average cost per prescription was 65-26. In September 1956, 579,536 prescriptions [351,930 forms] were dispensed at a total cost of £151,542. The average cost per prescription was £2-76. During October 646,835 prescriptions [394,204 forms] were dispensed at a total cost of £168,597. The average cost per prescription was £2-360.

Some of the principal guests with the branch chairman and his wife (Mr. and Mrs. K. W. Cowell) with other officers and former officers of the branch at the annual dinner and dance of the Reading Branch of the Pharmaceutical Society recently.

FESTIVE OCCASIONS

EXETER

Pharmacy Teaching Hope

The Mayor of Exeter (Dr. J. C. Fuller) thinks it probable that the city could once again cater for the teaching of pharmacy in view of the recently created University of Exeter and the city's active technical college. The mayor was speaking at the annual dinner and dance of Exeter Branch of the Pharmaceutical Society on March 13. Among the other principal guests were the sheriff of Exeter (Mr. A. P. Steele Perkins), and Mr. D. W. Hudson (vice-president of the Pharmaceutical Society). Mr. Payne (Branch chairman) proposed the toast to the city of Exeter. He mentioned the appeal for funds for the endowment of the recently created University of Exeter which was one of the most poorly endowed in the country. In his reply the Mayor responded, The toast to the Pharmaceutical Society was proposed by the Sheriff and Mr. D. W. Hudson responded, A telegram of good wishes was received from the Reading Branch (also holding its annual dinner-dance that evening).

READING

A Branch with the Secret of Success

PETROL shortages notwithstanding, 343 diners attended the annual dinner and dance of the Reading Branch of the Pharmaceutical Society at Reading on March 13. After grace by the ninety-four-year-old honorary branch

president (MR. F. W. VASEY), the branch chairman (MR. K. W. COWELL) took charge of the proceedings, with the assistance of the toastmaster. Mr. Cowell read a telegram sent on behalf of the Queen thanking the Branch for loyal greetings wired earlier in the day, and also a telegram from the president and members of the Liverpool Chemists' Association. Saying that he wanted to commemorate a pleasant year of office he then presented to Mr. G. C. Hammond (last year's president) a pastpresident's badge presented by himself and Mrs. Cowell to be passed on to each succeeding past-president. The guest of the evening was SIR HARRY JEPHCOTT (chairman, Glaxo Laboratories, Ltd.), who proposed the toast of the Branch. He said that Lady Jephcott (also a pharmacist) and he were most appreciative of being invited. Within a day or so he himself would be celebrating fifty years since he began his pharmaceutical apprenticeship. When one compared the 1898 pharmacopæia, on which he had been examined, with that of today, it was at once evident that there had been a vast upsurge of scientific discovery. New drugs were available in enormous range, and the pharmacist's function of developing them for patients' use had demanded a fantastic change in what the pharmacist was expected to know. Without a forward look in education it would have been impossible for the pharmacist to undertake the duties currently required of him, and the same forward look was necessary in shaping

the educational policy of the future. Throughout the world no pharmacist was held in greater esteem, he had found on his travels, than the one trained in Britain.

MR. COWELL, acknowledging the toast, recounted the story of the Branch. It had been conceived in 1925, he said, by founder members Vasey and Osborne while they were rowing on the river, and it had had such an enthusiastic membership that nine or ten past-chairmen were present that evening,

Some of the tombola prizes at Reading Branch dinner. At right is Mrs. H. Williams.

and one member (Mr. M. R. T. Scott) had come in from as far away as Wantage. Other guests included the president of the Proprietary Articles Trade Association (Mr. L. D. Smith) with Mrs. Smith, the chairman of the Oxford Branch of the Pharmaceutical Society and the president of the Reading Chamber of Commerce. Their secretary, Mr. Bert Williams had done as much as any to put the Branch where it was today, and the good relations between Reading pharmacists and doctors were evidenced by the number of medical men present as guests. An outstanding feature of the Reading dinner is the tombola, with its impressive tally of prizes. For large parts of the evening there was a queue to purchase tickets. Part of the proceeds goes to pharmaceutical charities.

MANSFIELD

Photo Finishers' Staff Dinner

ONE hundred members of the organisation of A. C. Vallance, Ltd., photo finishers, Mansfield, Notts, attended a dinner and dance of the company in Mansfield recently. Mr. Alistair Inglis

Diners at the recently held annual dinner and dance of A. C. Vallance, Ltd., Mansfield.

(president of the Wholesale Photo Finishers' Association) and his daughter travelled from Edinburgh to attend. Mr. N. J. Antoine proposed "The Company," Mr. George Vallance replying. Mr. VALLANCE said that when colour photography replaced black-and-white among amateurs his company would be

"in the front row." He was shortly visiting the United States for an exhibition at Washington and a tour round a colour photography plant at Rochester.

BRANCH MEETINGS

DARTFORD

Toxoids and Vaccines

A JOINT meeting of Dartford Branch of the Pharmaceutical Society and Kent subsection of the Royal Institute of Chemistry was held in Dartford recently, when DR. H. J. PARISH spoke on immunisation with toxoids and vaccines. He discussed briefly the various methods of immunisation against diphtheria, tetanus, pertussis and vaccination against smallpox. Careful timing of the treatment was necessary to avoid interference either from antioxins passed on to the infant by the mother or from different vaccines. Dealing with poliomyelitis vaccine he said that with the present incidence, 2,500 vaccinations were needed to prevent one case.

FINCHLEY

Customs and Excise Service

THERE was an authentic flavour about a smuggling story heard by members of Finchley and District Branch of the Pharmaceutical Society recently—it was told by custom and excise officer (Mr. F. C. Tanner). Mr. Tanner briefly outlined the history of the service, and went on to list the sources of revenue and their order of importance to the Treasury. Certain duties on non-essentials such as tobacco and alcohol were, he said, imposed to obtain revenue without hardship, on the theory that, if a person could afford those luxuries, he could afford to contribute to the country's expenses. Purchase tax, a war-time measure, was, unfortunately, still in operation; it produced about £400 millions per annum and to remove it now would mean that that enormous sum of money would have to be raised by some other form of taxation-not an easy thing to devise.

ABERDEEN

Formulary Preview

A PREVIEW of the 1957 British National Formulary was given to members of Aberdeen and North-eastern Scottish Branch of the Pharmaceutical Society at a recent meeting by DR. K. R. CAPPER (editor, Pharmaceutical Society's scientific publications). Notes on stor-

age and on new drugs which had been introduced since the last edition would be included and there would be a list of approved names and official titles. The National Formulary, he said, was originally introduced under the 1929 Insurance Act Committee and issued by the British Medical Association. During the war the National War Formulary made its appearance, and in 1948, with the onset of the National Health Service, the Joint Formulary Committee, comprising members of the Pharmaceutical Society, the British Medical Association and representatives of the Ministry of Health, was formed. The committee welcomed comments and criticisms from pharmacists on the compounding of any of the preparations contained in the Formulary.

Mrs. and Mr. Donald W. Hudson (vice-president of the Pharmaceutical Society) with Mr. Robert Copeland (a director, W. T. Copeland & Sons, Ltd.) at the Spode china works, Stoke-on-Trent, on the occasion of his visit to the North Staffs Branch of the Pharmaceutical Society recently.

GLASGOW

Formulation for Codex and N.F.

"FORMULATION for the British Pharmaceutical Codex and the National Formulary" was the subject of an address by Dr. K. R. Capper (editor of the Pharmaceutical Society's scientific publications) at a recent meeting of Glasgow and South-western Scottish Branch of the Pharmaceutical Society. DR. CAPPER said that the B.P.C., first published in 1907, formerly gave some of the information now given in Martindale. In 1934 it became the second book of standards. Preparations which could not be made because drugs in the formula were unobtain-

able were not included in it, but the drugs were given monographs. The Codex committee was a subcommittee of the Society and had eighteen members, sixteen of whom had pharmaceutical qualifications. The N.F. was largely a handbook for prescribers as well as a formulary. The formulation of new preparations which could be extemporaneously prepared involved stability of the preparation and the presentation of a product elegantly coloured and flavoured. That work was carried out partly in the Society's laboratory and partly by members of the committee and voluntary workers recruited through the Branches. Mr. J. Summers asked if there was any collaboration between Britain, the United States and the Continent in the formulation of official preparations. Dr. Capper said that there was no collaboration with the United States so far as the B.P.C. and the N.F. were concerned, but there was a considerable exchange of information with the United States and with Continental countries at various levels. Professor J. P. Todd said that the colouring of poisons could be traced back to the reign of James VI of Scotland, who had been responsible for the first poison law when he ordered the colouring of copper arsenite. He did not think that tablets should be coloured and Scottish pharmacists, he said, would resist the colouring of linctuses.

LEEDS

Common Law Responsibilities

THE pharmacist's responsibility in relation to his assistants' conversation with customers and other points of common law were dealt with by Mr. C. C. STEVENS at a recent meeting of the Leeds Branch of the Pharmaceutical Society. The pharmacist was also responsible, said Mr. Stevens, for keeping the entrance to, and the shop itself, clear of obstacles which might lead to accidents with subsequent damages claims. The fatuity of offering sums of money if the efficacy of a product was not proved and the precaution of placing warning labels on goods, disclaiming responsibility for possible harm to the person, were also discussed.

FIGURES IN THE PHARMACEUTICAL WORLD

PHARMACEUTICALLY speaking, Northern Ireland is unique among the territories of the United Kingdom in having an active and purposeful organisation of employees. For the causes of its vitality there is no need to look further than the members of the present committee, but to understand its continuity and effectiveness in operation a deeper probe is necessary, and the search would soon reveal the creative influence of Mr. W. H. Boyd. "Harry" Boyd, one of the leading figures in Northern Ireland pharmacy today, is well known also in Britain,

today, is well known also in Britain, especially among those pharmacists who regularly attend the meetings of the British Pharmaceutical Conference, at almost all of which he has been present since the first post-war Conference meeting at Torquay in 1948. He is a force in all the Northern Ireland pharmaceutical organisations: a member of Council and past-president of the Pharmaceutical Society of Ireland; a member of Executive and past-president of the Ulster Chemists' Association; a member of the Negotiating Committee (the Northern Ireland equivalent of the Central N.H.S. (Chemist Contractors) Committee); and a member and past-chairman of the Northern Ireland Local Pharmaceutical Committee. In the wider sphere of public affairs he is a member of the Northern Ireland Health Services Board and of the Northern Ireland Poisons Board. As a photographic retailer, too, he represents his colleagues on the local committee of the Photo-

graphic Dealers' Association.

Having attained such status in the counsels of pharmacy in Ulster, Mr. Boyd could easily have forgotten or outgrown the employed pharmacists in whose interests he had entered public life. That he has not done so may be seized upon as the clue to his character and personality. It was in 1945 that he and Mr. H. W. Gamble stood for election to the Council of the Pharmaceutical Society of Northern Ireland and, in slang parlance, "romped home." The assistants at that time were not convinced that the Council was as live as it should be, and successfully put up Messrs. Gamble and Boyd to wake things up. The employee pharmacists of that time and since have no reason to regret those efforts. Indeed they can congratulate themselves that the return of their candidates was one reason why the voice of youth is given such a good hearing and exercises an obvious influence on affairs today. When, for example, the Ulster Chemists' Association sends representatives to the Department of Health to argue a case or state a claim, among them, almost certainly, are one or two Associates who, far from being silent supporters, are acknowledged by all to have imposed

their own weight on the negotiations.

The confident rôle of the assistants today is a true reflection of the support they have always had from Mr. Boyd; though it is a long time since, as an employee himself, he has had identical interests with them. Mr. Boyd's influence is towards seeing one's own demands and aims in relationship to the economy

48. Mr. W. H. BOYD

of pharmacy as a whole. Salary claims, for example, that are too extreme stand small chance of being satisfied. They make no headway with proprietors who, from competition, must relate salaries to what the business will stand. And among the assistants themselves, some of whom are destined one day to be proprietors, exaggerated demands cannot command the wholehearted backing that would be given to more reasonable proposals. Mr. Boyd is able to speak with authority on that aspect from his own experience of 1938, when, though accepting chairmanship of the shortlived Belfast branch of the Pharmaceu-

tical Employees' Union affiliated to the Union of Shop, Distributive and Allied Workers, he warned that the demands his fellow-members were making had not the slightest chance of being successful. In the event it was the Union that succumbed, lasting only a few months. When, in 1945, the Associates' Section of the U.C.A. was set up and Mr. Boyd became a founder member of its committee (later serving a term as chairman) he saw to it that the Section's feet were firmly on the ground.

He already regarded it then, as he sees it now, as a means of training young pharmacists to see pharmacy's

problems as a whole. As a result, it is already clear that when present council members of the main professional and trade associations come to lay down their office, there are others of high calibre well able to take their place.

To see and help keep things in proportion has been Mr. Boyd's most valuable service to Northern Ireland pharmacy. It comes the more easily to him because he has never allowed other interests to be neglected. Thus in sport

he is secretary of the Ulster Chemists' Golfing Society and a member of council of the Ormeau Golf Club. In Freemasonry he is a member of the Galen Lodge and Chapter, a member and Past Master of the Corinthian Lodge, a member and Past King of the Fortwilliam Chapter, and a member of the Unity Preceptory. Proudly Irish, he is a connoisseur of the folk songs of his country, both sides of the Border. But he also speaks with

authority on the folk songs of England, and is on the best of terms with his English, Scottish and Welsh pharmaceutical colleagues.

Were circumstances to call for joint action between the chemists of Northern Ireland and those of England and Wales he would show the same loyal co-operation, and give the same valuable backing as, with Mr. Gamble, he gave to Scottish pharmacists in their stand for better terms in 1949.

London, E.11

Old-time Remedies

SIR,-While on locum duty recently in a South Yorkshire town I made up in a South Yorkshire town I made up quite a number of old-time recipes—mainly for country folk. They included "Four a'p'orths," Chelsea pensioners' drops, Indian brandy, "Home-made" lemonade crystals—and health salts. Of course our modern B.Pharm.'s would frown on such "Old wives' nostrums." But they fill many needs quite as well as But they fill many needs quite as well as some of the pseudo-scientific synthetic products foisted on to the present generation at greatly enhanced cost.

OLD-TIMER

Council Candidates' Platform

SIR,—As in former years the London Pharmaceutical Associations and East Metropolitan Branch of the Pharmaceutical Society are combining under the aegis of the London County Pharmaceutical Association to provide a plat-form for candidates for election to the Council of the Pharmaceutical Society who are being asked to state their policy and answer questions. This year the venue is the examination hall at 17 Bloomsbury Square, at 7.45 p.m. on Wednesday, April 17. It would be appreciated if intending candidates would inform me if they contemplate attending the meeting. A warm welcome is given to all pharmacists to attend.

London, W.C.1 W. F. WILKINSON

A Call for Strong Action

SIR,—With reference to your editorial of March 30, may I say that chemists have a good opportunity of identifying themselves with their colleagues, the doctors, in their trans-actions with the Ministry. They should make their own claims for those of the doctors, and declare a "strike" at one and the same time. Such action would ensure the acceptance by the Ministry of both claims. The time is past when negotiations round a table might bring results, for the Government has given ample

proof that it is deaf to all entreaties made in a reasonable manner, and strong action is the only thing it understands. Let chemists stand by the doctors in this fight. Such action would also demonstrate to the public that the general practitioner is helpless without the chemist, for unless a doctors' prescription can be translated into a bottle of medicine, or a box of tablets, his treatment is practically useless.

Greenford M. ROBERTS WILLIAMS

"Co-operation" Not Obvious

SIR,—I have noted in my local Co-operative stores that each department seems to be in competition with the others. Counter shows of "night-cap" beverages, baby foods, fruit drinks and "patent" medicines vie with one another in pharmacy and grocery departother in pharmacy and grocery departments. Lipsticks and perfumes are found in the millinery and drapery departments as well as in the pharmacy, which shares with the ironmacy, which shares with the iron-mongery department the sale of sunlamps, electric blankets, hot-water bottles, sponges and toilet requisites. A branded aspirin is on display at the tobacco counter and even in the cafeteria. No wonder that, in the annual report of any large Co-operative concern, the pharmacy department figures are low on the departmental returns. Is it not time for the Pharmaceutical Society and National Pharmaceutical Union to press for at least the sale of all medicines and medical products to be sold by authorised sellers (pharmacists) exclusively.

COADJUVANT

Royal Jelly

SIR,—Having for a long time taken a special interest in Royal jelly and the claims made for it, and having made myself familiar with the products of the several Continental producers, I may be in a position to give guidance upon it to some of your readers. That Royal jelly is a remarkable and natural food, which restores health and vigour to the great majority of those who take it, I can vouch from personal ex-perience and wide investigation. I have seen the jelly work wonders within forty-eight hours of administration of the first dose. The isolation and use of Royal jelly for human consumption are recent, though its importance and place in the hive and in honey production have been known to apiarists for hundreds of years. No beehive could exist, and not a single ounce of honey could be produced, without it. That

it has to be "stabilised" for human use is obvious. The method of stabilisation-and each producer has his own-is no one manufacturer's secret. There are several highly reputable producers in whose product the public can have perfect confidence. Some firms incline towards exaggerated claims for their own method, but those claims are largely for advertising purposes. Little heed need be paid to them. A matter of far greater con-cern is the product's nutritional value. Buyers should note carefully what amount of Royal jelly goes into the ampoules supplied. Royal jelly as prepared for human consumption by the best firms is an admixture of the jelly with liquid honey. The honey is there for administrative ease as well as for its preservative ease as well as for its preservative properties; it is the natural vehicle of the jelly. But the Royal jelly itself is what revitalises, and since the weight of it in each box of ampoules by different producers varies enormously (some have too little to be of service), the public would be well advised to examine that aspect well advised to examine that aspect closely if they want full nutritional value and economy of purchase. The Royal jelly content is given in mgm. (or should be) on each box. Most authorities consider that an amount of less than 1,000 mgm. is inadequate. "The Milk of Bees," one product on sale in this country contains 1,010 mgm. of Royal jelly in twenty-six ampoules, plus 0,250 mgm. of Queen's embryos (rich in amino-acids). Preparations with a still higher percentage of Royal jelly per ampoule are obtainable and most serviceable in serious illness, but at a proportionately higher cost. Royal jelly is also available in ampoules for injection. It cannot be made synthetically, nor can chemical additions be made to it, even in extremely small quantities, without spoiling or destroying its constituents. Royal jelly is not a "cure-all." It is not a medicine. It is a natural tonic like honey, but much more active.

Manufacturers Please Note

SIR.—I find your column giving a list of lines to be advertised on I.T.V. very useful when dressing my window, but often find it incomplete. I won-dered whether, if advertisers knew that use was made of it by retailers, they would be more inclined to notify you of their bookings.

J. ANDERTON Preston

fantzen s launches revolutionary new watertight 'Diving Belle'

In the biggest-ever advertising campaign for a swimcap.

Nearly $6\frac{1}{2}$ million women will see this striking advertisement in WOMAN plus powerful backing throughout Jantzen's National Swimsuit Campaign!

TIE-IN

with this terrific campaign

CASH-IN

on the big profits

Diving Belle' features an exclusive Herringbone Rim, that was developed by scientists after extensive research. It's designed to keep hair really dry! 'Diving Belle' joins Jantzen's seal-tight 'Diving Girl' swimcap, a rapid seller you know already.

'Diving Girl' 5/3d. 'Diving Belle' 7/6d. (incl. P.T.)

All Jantzen swimcaps are packed in individual cartons, designed to keep each cap absolutely clean. They come to you in sturdy 2-dozen sell out containers that make excellent, hard-selling displays; and, this year, there's a special 'Jantzen Original' Tag attached to every swimcap. Both these attractive display items are designed to tie in with Jantzen's big publicity campaign for 1957!

Don't miss out on your share of the big PROFITS to be made on Jantzen Swimcaps. They're real money-spinners and bound to be big sellers!

Remember, when ordering Jantzen swimcaps you can choose from six different packs containing various sizes and colours. Each swimcap carton has a cellophane 'window' so that the colour and size of the swimcap are easily visible. Order your supplies from your regular Chemists' Sundriesman NOW!

If you have any trouble in ordering, contact Long & Hambly Ltd. (Sole Licensees for Jantzen Swimcaps), at High Wycombe, Bucks. Tel: High Wycombe 2321.

More Than Ever Like Guesswork

In 1957-58 the cost of the pharmaceutical services under the National Health Service is expected (see p. 365) in England and Wales to increase by about 5 per cent. and in Scotland to fall by about 1 per cent. Thanks, however, to the current basis of prescription charges the cost to be borne by the Exchequer is expected to fall in the three countries by respectively 2.7, 1.5 and 6 per cent.

The impact of the new prescription charges (in the shape of fewer prescriptions) is also expected to be seen in the figures for dispensing-fee payments, where falls of about 8 per cent. in England, 7 per cent. in Wales, and a slight drop in Scotland are envisaged. The estimated drop in Scotland would probably be greater but for the fact that the dispensing fee there was recently increased, and will have its effect only in the next financial year, whereas the estimates for England and Wales take account of the higher fees that were paid during the financial year 1956-57.

If the prescription levy on the new basis was, when imposed, expected to result in fewer prescriptions, there was never much doubt that the individual prescriptions would also be dearer. The Estimates put the rise in the ingredient at about 8 per cent. in England and 10 per cent. in Wales; but indicate a drop of about 1 per cent. in Scotland. Thus it would appear that, from the only slightly smaller number of prescriptions expected, and the slight drop in ingredient cost, the effect of the levy in Scotland is being largely discounted. Whether the authorities are correct in that assumption remains to be seen. Certainly in Scotland in December 1956 the number of prescriptions fell substantially, but the average net ingredient cost rose by fourpence. It may be that that result was caused only by the sudden shock of the new charges, and that costs and numbers will shortly settle down at about their former levels.

The yield from prescription charges, it is to be noted, is expected to be in 1957-58 52 per cent. higher in England; 56 per cent. higher in Wales; and 32 per cent. higher in Scotland than it was in 1956-57. The Scotlish figure reflects the lower average number of prescriptions per form than in England and Wales. Since the average number of prescriptions per form in Scotland is low, it can be argued that changing the levy basis from "per form" to "per prescription" will have less effect than where the ratio of prescriptions to forms is higher.

The levy charge has certainly made the task of estimating pharmaceutical costs more unpredictable than it was. Added to a general inflationary situation nationally and an imminent Budget that may contain further surprises, the levy must cause even less reliance than usual to be placed on the estimated costs for the forthcoming year, slight as that has been in the past.

A NEW FILM

People Apart

British Epilepsy Association, 27 Nassau Street, London, W.1. 16-mm. or 35-mm. Black and white. Sound. Running time thirty-five minutes.

MADE by Guy Brenton (Morse Films) with the aim of giving the public facts about epilepsy and so removing many prevalent fears due principally to ignorance, the film is made without professional actors. Its principal characters are actual sufferers who have co-operated in a documentary presentation of some of their thoughts and feelings in adapting themselves, with greater or less success, to a world in which most people, though "normal," are preoccupied with their own problems and tend to fear what they do not understand. Without "soft-pedalling" in any way the handicaps attendant upon the condition, the film makes clear on the one hand that, between seizures, an epileptic is normal; and on the other that an excess of sympathy is uncalled for and may be harmful, the sufferer threatening no danger to others and usually none to himself. The Association wants as many people as possible to see the film, and intends to apply for a certificate for public showing. The film is available now for private showings (cost: about £4 for the 35-mm. version; £2 for the 16-mm.). Applications should be made to the Association's general secretary.

Onward from Galen

A CURRENT CAUSERIE

"JUST after 7 on a Saturday night," writes a chemist contractor, "there was a click at the shop door and the last rota patient called out 'Look what's come through the letter box.' I put down the measure and read the note scribbled on an odd piece of cardboard: 'You are lazy'! That was too much after a busy Saturday and an hour's rota, and I dashed to the door. A little man was just cycling off and I ran after him flourishing the note, calling out 'Did you write this?' The man had been the last-but-one rota patient and he gave a grunt, 'But why? We told you we only had a drop of lotion C left and asked you to come back on Monday morning.' The man looked blank and it suddenly dawned on me that he was deaf and dumb. Beckoning him back to the shop I wrote out the message on a piece of paper and drained out the $\frac{1}{2}$ oz, of lotion. He nodded and looked pleased and I let him out the shop, heartily wishing the deaf and dumb carried the equivalent of a white stick.

A MILD CASE OF ENVY

BRISTOL'S HALLS OF RESIDENCE

An introduction to the temporary homes of many Conference members this year

HEN Mr. George Alfred Wills commissioned the building of a hall of residence at Stoke Bishop for students of Bristol University he said "Build the best Hall you can, and I'll foot the bill," or words to that effect. That, of course, was in the more spacious days of 1929—long before the 1939–45 war. It is doubtful whether any benefactor today, however wealthy, could give such a free hand.

The authorities took as their general model a typical Cambridge college, built around a quadrangle. Along each of the four sides are entries, each leading to living quarters for twelve or ten students. The rooms abut on to staircase landings but have no internal corridors to the next set of

The oak-panelled dining room at Wills has much the character of one of the College dining rooms at Oxford or Cambridge. The adjoining large common room will provide comfort and relaxation for its temporary residents, although it looks rather bare in the photograph, which shows it without its usual chairs.

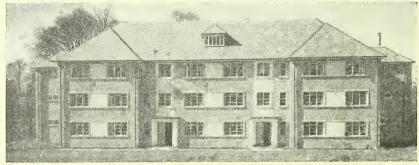

Wills Hall is only one of five halls that will be available for Conference visitors. A near neighbour, Churchill Hall, comprises two converted mansions, "The Holmes" and "Claverton," each with one-, two- and three-bedded rooms, and a larger main building, opened only in 1956. The single rooms of the new Churchill building are handsomely decorated, and furnished much as in Wills Hall, except that

Burwalls, formerly the residence of Sir George Wills; and Clifton Hill House, close neighbour to Manor Hall, picture at the head of the page. At right, the new Churchill Hall building, opened 1956.

twelve or ten chambers. At Wills Hall practically every one of the 165 resident students has his own room, combining bedroom and study, with bed, gas fire, table, lounge chair, one or two upright chairs, and shelves for books. A built-in wash-basin is ordinarily concealed behind one of two "cupboard" doors (the second closing a built-in wardrobe).

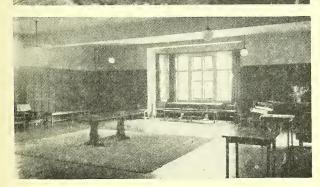

Wills Hall in its outer aspect is shown at left. The smaller illustration above shows the typical quadrangle entries to the living rooms. Below are the refectory, a typical bedroom and the common room (minus its usual chairs).

they open on to a corridor. Washing facilities at this Hall are grouped near the corridor ends. They comprise washbasins, baths and showers. There are also at Churchill other "communal" facilities—among them a room for making afternoon tea, and a room for washing and ironing. The dining room for the three domiciles of Churchill is at "Claverton," a mansion reflecting the comfortable standards of the Victorian "The Holmes," a rather older building of some architectural distinction, has oak panelling round its principal rooms, a handsome timber staircase, and a spacious common room with a polished floor that does duty admirably on occasion for dances. The common room looks out on well laid-out

and well cared-for flower gardens. A billiard-room adjoins the common room.

A third "men's" Hall (there will not, of course, be the same segregation of Conference members as of students) is just across the Clifton Suspension Bridge at Leigh Woods in Somerset. Burwalls, opened in 1946, was formerly the home of Sir George Wills and has accommodation for forty residents.

The two remaining Halls of Residence, ordinarily for women students, are the Clifton Hill House and Manor Hall, both comparatively near to the university and practically adjoining one another at the top of Clifton Hill. Clifton Hill House is a Georgian mansion that first became available for its present purpose in 1909. Manor Hall, set splendidly among trees, was built in 1932, again through the beneficence of the Wills family.

In proportion to the total accommodation the number of double rooms is not large, and they are mainly in "Claverton" and "The Holmes." But the Local Conference Committee is expecting that many married couples will prefer adjacent single rooms at Wills or Manor, with their built-in wash-basins and generally more modern character.

There can be no question but that Bristol University is extremely fortunate in the accommodation it has for its students, and the Local Conference Committee must be accounted equally fortunate in being able to place such amenities at the disposal of the visitors, It is a safe prophecy that many Conference members, after their work in the Halls of Residence, will leave them "with affectionate regret" to use a phrase taken from the book "The Life of a University," which in fact describes the University of Bristol.

GUIDE TO NEW MEDICAMENTS

Information about proprietary products supplied principally on prescription. Reprints on perforated gummed paper for affixing to index cards are obtainable from the Editor.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

TUCAL lozenges

Manufacturer: Chelspa, Ltd., Ucal Works, Cheltenham, Glos. Description: Pleasantly flavoured lozenges, each containing phenol, 0.9 per cent.; menthol, 0.9 per cent.; iodophenol, 0.03 per cent.; amyl-m-cresol, 0.06 per cent.; thymol, 0.06 per cent.

INDICATIONS: To relieve soreness from viral infection and in tonsilitis, Vincent's angina, ulceration, glossitis, thrush, tooth extraction, etc.

DOSAGE: Adults and Children, in severe cases, 1 lozenge to be slowly sucked every half-hour; as a prophylactic, 1 lozenge to be slowly sucked every hour or so.

How Supplied: In packs of sixteen, fifty and 100.

FIRST ISSUED: January 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

VIACUTAN emulsion

Manufacturer: Ward, Blenkinsop & Co., Ltd., 37 Queen Square, London, W.C.1.

DESCRIPTION: An oil-in-water emulsion for external application containing 1 per cent, silver dinaphthylmethane disulphonate.

INDICATIONS: Treatment of varicose ulcers, bed sores, burns and scalds.

USE: Layers of gauze soaked in the emulsion are applied to the ulcer and covered with cotton wool and a built-up pad of plastic foam. A cotton elastic non-adhesive bandage is then applied very tightly, commencing just above the toes with a figure-of-eight around the ankle and up the leg to just below the knee, with an extra turn over the ulcer. Dressings should be changed daily.

How Supplied: in 100- and 400-c.c. bottles.

FIRST ISSUED: February 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

BILOSTAT

MANUFACTURER: Weddel Pharmaceuticals, Division of The Union International Co., Ltd., Watsons Road, London, N.22.

Description: Tablets, each containing dehydrocholic acid, 0.25 gm.

INDICATIONS: Biliary and hepatic disorders, See maker's literature.

Dosage: 1-3 tablets two or three times a day, or as directed. How Supplied: In bottles of twenty and 100 tablets.

FIRST ISSUED: February 11, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

COLLOZETS

Manufacturer: Crookes Laboratories, Ltd., Gorst Road, Park Royal, London, N.W.10.

Description: Pleasantly flavoured lozenges each containing tyrothricin, 1 mgm.; and cetylethyldimethylammonium ethyl sulphate, 2 mgm.

INDICATIONS: Sore throat associated with coughs and colds; streptococcal tonsillitis and pharyngitis; Vincent's angina; oral thrush (moniliasis); stomatitis; gingivitis; prophylaxis against colds and sore throats when exposure to infection has occurred; prophylaxis against stomatitis and parotitis in debilitated patients.

Dosage: 1 lozenge should be placed either under the tongue or in the cheek pouch every two or three hours or more frequently as required, but the total daily dose should not exceed 8 lozenges. The treatment should be continued for two or more days until condition has been brought under control. For young children the lozenges may be broken in half.

How Supplied: In box of eighteen (foil-wrapped).

FIRST ISSUED: December 1956.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

TARCORTIN cream

DISTRIBUTORS: (for Great Britain): Fassett & Johnson, Ltd., 86 Clerkenwell Road, London, E.C.1.

Manufacturer: Stafford-Miller, Ltd., 166 Great North Road, Hatfield, Herts. (By arrangement with Reed & Carnrick, Jersey City, 6, N.J., U.S.A.)

Description: A synergistic combination of hydrocortisone and coal-tar extract, 0.5 per cent, hydrocortisone and 5 per cent, special coal-tar extract in a hydrophylic cream base.

INDICATIONS: Subacute and chronic dermatoses.

Use: Applied locally to affected areas three or four times a day.

How Supplied: In 7-gm, tube.

FIRST ISSUED: December 1956 (in United Kingdom).

REFERENCES: Bleiberg, J. med. Soc., N.J., 53, 371. Welsh and Ede, Ohio St. med. J., 1954, 50, 837.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

UNIPLEX

Manufacturer: Weddel Pharmaceuticals, Division of The Union International Co., Ltd., Watsons Road, London, N.22.

DESCRIPTION: Tablets, each containing aneurine hydrochloride, 1 mgm.; riboflavine, 1 mgm.; nicotinamide, 5 mgm.; granulated whole liver extract, 125 mgm.

INDICATIONS: Treatment of listlessness, undue fatigue, anorexia and irritability with anxiety symptoms; and all conditions where the vitamin B intake may be below normal, such as pyrexia, debility, glossitis, neuritis, pregnancy. lactation, diabetes, alcoholism, impaired kidney or liver function, and for the patient who needs to live on a restricted diet.

Dosage: 3 tablets daily.

How Supplied: In bottle of fifty tablets.

First Issued: February 11, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

EF-CORTELAN with neomycin eye drops

MANUFACTURER: Glaxo Laboratories, Ltd., Greenford, Middlesex. Description: Eye drops containing hydrocortisone acetate, 1 per cent.; neomycin sulphate, 0.5 per cent. (equivalent to

0.35 per cent, neomycin base).

INDICATIONS: Inflammatory conditions due to trauma, allergy and other irritants, especially when infection is present or suspected (e.g., infected corneal ulcer).

DOSAGE: 1–2 drops instilled into the eye every one or two hours. How Supplied: In 3-c.c, vial with dropper.

FIRST ISSUED: November 1956.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

MYCIGUENT lotion

MANUFACTURER: Upjohn of England, Ltd., Crawley, Sussex.

Description: A stable fluid emulsion miscible with water and containing neomycin sulphate in the same concentration (0.5 per cent.) as is employed in Myciguent ointment. It is a vanishing type of lotion and is therefore particularly acceptable for use on the face, scalp and other exposed areas. It is bland and non-irritating and especially suitable for children. Each c.c. contains: Neomycin sulphate, 5 mgm. (equivalent to 3.5 mgm. neomycin base); methylparaben, 2 mgm.; and butyl-p-hydroxybenzoate, 3 mgm.

INDICATIONS: Insect bites, minor cuts and abrasions, impetigo, folliculitis, infectious eczematoid dermatitis, secondarily infected ulcers and burns, napkin rash and infections associated with prickly heat.

Use: To be applied once or twice daily.

How Supplied: In 1-fl.-oz. plastic squeeze bottle.

FIRST ISSUED: January 1, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

PENAVLON V*

Manufacturer: Imperial Chemical Industries, Ltd., Pharmaceuticals Division, Fulshaw Hall, Wilmslow, Ches.

DESCRIPTION: Tablets, containing phenoxymethylpenicillin (penicillin V) equivalent to 120 mgm, free acid, and equal to 200,000 units penicillin G.

INDICATIONS: All penicillin-sensitive infections. Penicillin G may be given by injection to obtain an immediate peak level, but subsequent therapy should be with Penavlon V tablets.

Dosage: Adults, 1 tablet four times daily (every six hours); in severe infections dose may be increased as considered necessary. Children, half adult dose. Infants, quarter adult dose. The tablets should not be sucked, but swallowed quickly (whole or crushed) followed by a drink of water. They may be taken at any time, including meal times.

How Supplied: In containers of fifteen, 100 and 500 tablets.

FIRST ISSUED: February 4, 1957.

REFERENCES: J. biol. Chem., 1946. 175, 793. Lancet, 1956. 2, 328. Wien. med. Wschr., 1953. 103. 602.

PHENOXYMETHYL PENICILLIN: See Penavlon V.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

EF-CORTELAN with neomycin skin ointment

MANUFACTURER: Glaxo Laboratories, Ltd., Greenford, Middlesex.

Description: An ointment containing hydrocortisone acetate,

1 per cent.; neomycin sulphate, 0.5 per cent. (equivalent to 0.35 per cent. neomycin base) in water-miscible base.

INDICATIONS: In the following conditions, particularly when infection is present or imminent: anal and vulvar pruritus. contact dermatitis of various types, allergic eczema, food eczema, infantile eczema, eczematoid reaction of the eyes and ears, neurodermatitis, nummular dermatitis and seborrhoeic dermatitis.

Use: A small quantity of ointment should be applied gently to the affected area two or three times daily.

How Supplied: In 5- and 15-gm, tubes.

First Issued: November 1956.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

TUCAL linctus

MANUFACTURER: Chelspa, Ltd., Ucal Works, Cheltenham, Glos. Description: A linetus containing (per cent. w/v): Pholcodine tartrate, 0·21; terpin hydrochloride, 0·17; menthol, 0·34, amyl-m-cresol, 0·05; thymol, 0·05; iodophenol, 0·2; phenol, 0·53.

INDICATIONS: As an anti-congestive in influenzal cough, chronic cough of the aged, chronic and subacute bronchitis, bronchopulmonary congestion. Also in measles and whooping cough of children.

Dosage: Adults, 1-2 teaspoonfuls after food, and at bedtime (a little water may be added if desired); Children, (five years and over), ½-1 teaspoonful, according to age, as above.

How Supplied: In bottles of 4, 40 and 80 fl. oz.

FIRST ISSUED: January 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

BILEVAC

Manufacturer: Weddel Pharmaceuticals, Division of The Union International Co., Ltd., Watsons Road, London, N.22.

Description: A biliary stimulant evacuant in tablet form, each tablet containing sodium tauroglycocholate, gr. 1; rhubarb, gr. ½; aloin, gr. 1/10; ol. menth. pip., q.s.

INDICATIONS: Hepato-biliary dysfunction where constipation is a common accompaniment. See also maker's literature,

Dosage: 1 tablet three times a day after meals or 2 tablets at night,

How Supplied: In bottles of fifty and 100 tablets.

FIRST ISSUED: February 11, 1957.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

PREMARIN INTRAVENOUS

MANUFACTURER: Imperial Chemical Industries, Ltd., Pharmaceuticals Division, Fulshaw Hall, Wilmslow, Ches. (Distributed in the United Kingdom by arrangement with Ayerst, McKenna & Harrison, Ltd., Montreal, Canada.)

DESCRIPTION: A preparation of conjugated estrogens (derived from pregnant mares' urine) designed for intravenous administration when reconstituted with sterile diluent.

INDICATIONS: To produce rapid arrest of prolonged and excessive functional uterine bleeding; and other types of hæmorrhage including: Ear, nose and throat: Epistaxis; posttonsillectomy and adenoidectomy; Gastro-intestinal system: Oral; œsophageal; peptic ulcer, rectal; Genito-urinary system: Bleeding due to kidney stones, tumours, following prostatectomy; also intraocular hæmorrhage; hæmoptysis due to carcinoma; pre- and post-operatively in gastro-intestinal, gynæcological, prostatic and dental surgery.

Dosage: 20 mgm., intravenously. The dose can be repeated within a few hours if necessary. *In children*, 5-10 mgm. should be given per injection depending on body weight. If necessary the drug can be given intramuscularly.

How Supplied: In package providing one vial containing 20 mgm. of estrogens expressed as sodium estrone sulphate, and one 5-c.c. vial of sterile diluent with 0.5 per cent. phenol. First Issued: February 1957.

REFERENCES: West. J. Surg., 1955. 63. 711. Curr. med. Dig., 1954. 21. 30. J. Amer. med. Ass., 1955. 159. 546. Proc. Soc. exp. Biol., 1957. 94. 92.

THE CHEMIST AND DRUGGIST Guide to New Mcdicaments (April 6, 1957).

EF-CORTELAN with neomycin skin lotion

Manufacturer: Glaxo Laboratories, Ltd., Greenford, Middlesex. Description: A lotion containing hydrocortisone alcohol, 0.5 per cent.; neomycin sulphate, 0.5 per cent. (equivalent to 0.35 per cent, neomycin base).

INDICATIONS: In the following conditions, particularly when infection is present or imminent: Anal and vulvar pruritus, contact dermatitis of various types, allergic eczema, food eczema, infantile eczema, eczematoid reactions of the eyes and ears, neuro-, nummular or seborrhoeic dermatitis.

Use: A small quantity of lotion should be spread gently on to the affected area two or three times daily.

How Supplied: In 20-c.c. plastic bottle.

FIRST ISSUED: November 1956.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

EF-CORTELAN with neomycin intra-articular injection

Manufacturer: Glaxo Laboratories, Ltd., Greenford. Middlesex. Description: A sterile suspension, each c.c. of which contains hydrocortisone acetate, 25 mgm.; neomycin base, 3.5 mgm. in normal saline.

INDICATIONS: Rheumatoid arthritis, osteoarthritis, traumatic arthritis, acute gouty arthritis, bursitis, Dupuytren's contraeture.

Dosage: Varies with joint to be treated. Knee requires 25 mgm.; smaller joints usually 10-15 mgm. A dose of 50 mgm, should not be exceeded. Repeat injections are usually necessary.

How Supplied: In 5-c.c. vial, First Issued: November 1956.

THE CHEMIST AND DRUGGIST Guide to New Medicaments (April 6, 1957).

ADELPHANE

Manufacturer: Ciba Laboratories, Ltd., Horsham, Sussex.

Description: Tablets, each containing 0·1 mgm. Serpasil (reserpine) and 10 mgm. Nepresol (1,4-dihydrazinophthalazine) sulphate.

INDICATIONS: Mild or moderate hypertension where response to Serpasil alone is inadequate.

Dosage: See manufacturer's literature.

How Supplied: In bottles of twenty-five, 100 and 500 tablets.

First Issued: January 1, 1957.

NOTES ON NEW MEDICAMENTS

Comments on items given in Guide to New Medicaments (p. 380), especially to show their relationship—pharmacological or chemical—with other products or compounds.

ADELPHANE.—A combination of reserpine and 1:4-dihydrazinophthalazine, with a synergistic action. Reserpine has a blood-pressure reducing effect by its action on the central nervous system. The other component reduces blood pressure by relaxing the peripheral vessels. Other combinations of reserpine with other substances include Scominal (with theobromine and phenobarbitone), Serpatonil (with the anti-depressant Ritalin), Apresoline is a preparation of 1-hydrazinophthalazine, also known as hydralazine.

BILEVAC.—Contains bile salts with rhubarb and aloin. Veracholate, Pancrobilin and Taxol are similar preparations of bile salts and laxatives. Bilron, Lactobyl and Mycolactine contain bile salts and other factors. Desibyl is a preparation of desiccated bile. Dehydrocholin, Felamine, Bilostat, Chonex and Certonin are examples of choline preparations or derivatives.

COLLOZETS. — Lozenges containing the antibiotic tyrothricin together with a quaternary ammonium compound as an antiseptic. Other lozenges containing tyrothricin, but with benzocaine as a local anæsthetic, include Tetrazets, Tyrozets, Tyrosolven, Tracinets and Graneodin. Other antibiotic lozenges include Streptets, Pondets, and those containing the tetracyclines.

MYCIGUENT LOTION.—Therapeutic constitucnt is neomycin. That antibiotic has a wide range of activity and has a low index of sensitisation. Stable in solution, hence suitable for exhibition in an aqueous vehicle. Other neomycin products for topical use include Myciguent ointment, neomycin ointment, Graneodin, Neobacrin, Cicatrin. Products containing both neomycin and hydrocortisone include Hydroptic, Neocortef, Hydroderm, Hydromycin, Hydrospray, Ef-cortelan with neomycin and Cortril with neomycin. Deltratracin and Hydeltracin topical lotion contain neomycin with prednisolone; Hydrodeltalone with neomycin is a cream with similar constituents.

PREMARIN. — Commercial oestrogen products for injection are usually solutions in oil or aqueous suspensions but the natural hormones are water soluble. Water solubility may be conferred by conjugation and combination with an alkali metal such as sodium. Sodium oestrone sulphate is a product of that type. A similar compound was once available under the name Strogene. The rationale of the use

of Premarin in hæmorrhage generally is not yet clear, but experimental evidence indicates some specific effect on the clotting process.

TARCORTIN.—A preparation of hydrocortisone with a non-staining tar extract. Of use in chronic dermatoses when intolerance to tar alone precludes treatment, or when the response to hydrocortisone is insufficient. Examples of non-staining tar preparations are E.S.T.P., and Pixcyl. Tar Dermannent is a solution of washed tar in a resin and alcohol base.

TUCAL,—Linctus and lozenges containing pholcodine. That cough centre depressant is free from some of the side effects of codeine, such as constipation. Other pholocodine products include Ethnine, Hewfolco, Memine and Lipect. Examples of other cough-depressant preparations are Taoryl, Pectamol, Respenyl, Sedulon, Piriex, Orthoxicol, Romilar, Becantyl, etc.

UNIPLEX.—A preparation of some of the vitamins of the B group together with liver extract. Products of similar or related composition include Vitepron, Lederplex and Lextron.

VIACUTAN. — Chemistry:—Silver salt of dinaphthylmethane-disulphonic acid. The acid radical appears to confer the power of deep penetration into tissues. The corresponding mercury salt is found in Penotrane.

PHYSICAL SOCIETY'S EXHIBITION

New developments in scientific instruments on show

MANY new developments in scientific instruments and apparatus were seen at the Physical Society's forty-first exhibition held in London, March 25–28.

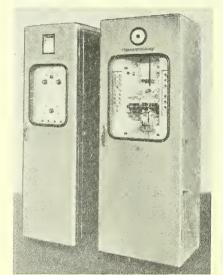

For the grinding of seeds, leaves, roots, etc., for such purposes as moisture determination, C. F. CASELLA, LTD., Regent House, Fitzroy Square, London, W.I, showed a special grain mill. The mill works on a shearing principle which rapidly reduces the hardest grains to an even powder without an undue rise of temperature and without the clogging that a high moisture content could cause.

Automatic Analyser

Shown on the stand of ELECTRONIC INSTRUMENTS, LTD., Lower Mortlake Road, Richmond, Surrey, was the Titromatic analyser which has been developed in conjunction with the Billingham Division of Imperial Chemical Industries, Ltd. Designed for large-scale chemical manufacture, the apparatus can perform the work of two or three chemists. It also supplies a continuous visual record which enables variations in the plant stream to be instantly detected and corrective measures applied. The equipment consists of two separate cubicles, one containing the chemical apparatus, with its flasks, burette, and electrically-controlled taps, whilst the other holds the electronic control gear which determines the sequence and duration of the operations, and detects the endpoint of the titration. The chemical unit is connected into the main plant stream, and, at regular intervals, pre-set to be between three minutes and half an hour, a measured quantity of the product is drawn off and fitrated. Both acid-base and redox titrations can be carried out. Complete manual working is possible for adjustment or special testing purposes. Also shown by the company was an automatic titrimiter for either volumetric or coulometric titrimetry.

A finalised version of the Eel blood cell counter, the prototype of which was first exhibited in 1955 was shown by EVANS ELECTROSELENIUM, LTD., Potter Street, Harlow, Essex.

Potentiometric micro-analysis apparatus for the accurate determination of chlorides in small volumes of sample was shown by A. GALLENKAMP & Co., LTD., 17 Sun Street, London, E.C.2.

Titromatic analyser (Electronic Instruments, Ltd.).

The apparatus was developed in consultation with Dr. I. D. P. Wootton (Post-graduate Medical School, London).

The Griffin vapour phase chromatography apparatus, mark II, a development of the mark I model exhibited at the Physical Society's exhibition in 1956, was shown by GRIFFIN & GEORGE, LTD., Ealing Road, Alperton, Wembley, Middlesex, The temperature range has been increased to permit resolution

at reduced pressures of mixtures having components with boiling points up to 350°C. at atmospheric pressure.

Spectrophotometer

The H 800 double-beam recording infra-red spectrophotometer was shown by HILGER & WATTS, LTD., 98 St. Pan-cras Way, Camden Road, London, N.W.1, with two new attachments, both of which can be fitted to the standard instrument. They extend the range of samples that can be examined. The first is a reflecting microscope which, by producing at the position of the sample a reduced image of the Nernst filament, makes it possible to examine such small samples as single fibres. The second attachment is for measuring and recording the infra-red reflectance of a sample relative to that of a chosen standard. The same company showed a new atomic-absorption attachment for their Uvispek spectrophotometer. sample solution is sprayed from an atomiser into a flame, through which passes the light of a hollow-cathode lamp emitting the radiation of the element to be determined. The absorption due to the element is measured at the appropriate wavelength. The company also exhibited the prototype of a newly

designed electrophoresis apparatus.

On the stand of the MEDICAL RESEARCH.
COUNCIL was demonstrated the centrifugal washing of red blood cells to free them from glycerol used to store them in the frozen state. A normal centrifuge is fitted at its axis of rotation with a distributor head which supplies a wash solution of glycerol and saline to two standard blood bottles (eventually it will be possible to accommodate four bottles). The centrifugal pumping action passes the wash fluid in through a short needle in the neck of the bottle and out through a long needle. At 2,000 to 2,100 revolutions per minute the cells are first packed during a period of half an hour into one endi

of the bottle. The washing then continues for a further hour and a half to two hours. For autoclaving the entire distributor head can be removed. The apparatus can also be used to free red cells from plasma for special trans-fusion purposes. The equipment was designed and produced jointly by the Blood Transfusion Research and the Experimental Radiopathology Research Units of the Medical Research Council at Hammersmith Hospital, Lon-W.12, and the National Institute don, W.12, and the National Institute for Medical Research, London, N.W.7.

An improved version of the Mervyn NPL infra-red spectrometer was shown by Mervyn Instruments, Ltd., St. John's, Woking, Surrey. Curved slits give an even higher degree of resolu-

tion.

The electron irradiation of among other items, drugs, surgical dressings and sutures to sterilise them was demonstrated on the stand of METRO-POLITAN-VICKERS ELECTRICAL CO., LTD., Trafford Park, Manchester, 17.

Free-piston Burette

tractive.

Exhibited by the National Research Development Corporation, 1 Tilney Street, London, W.1, was a free-piston burette which is claimed to give on the macro scale many of the advantages of the micrometer burette but without the The instrumechanical attachments. ment is made from precision bore tubing having fitted to it a hollow glass piston which is a close sliding fit in the bore. The piston rides freely on the column of liquid, indicating the volume delivered.

A completely re-designed range of chemical balances was shown by L. OERTLING, LTD., Cray Valley Road, St. Mary Cray, Orpington, Kent. Among the many changes is a new method of chassis construction. All parts of the instrument are now mounted on one rigid light alloy chassis, the case serving merely as a dust cover. Improved reliability of operation has thus been obtained. Another feature is the location of controls to minimise fatigue and expedite weighing. The appearance of the balances is entirely at-

An automatic x-ray spectrometer was shown by the SOLARTRON ELECTRONIC GROUP, LTD., Thames Ditton, Surrey. A continuous x-ray spectrum is directed from an x-ray tube on to the sample or specimen. The re-radiated x-rays of specific wavelength from the sample are passed through a crystal, which acts as a diffraction grating and produces a line spectrum. After diffraction, the x-rays are collimated and detected. The detector may be a geiger counter, proportional counter or scintillation counter.

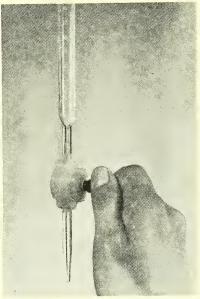

A pre-production version of a fully compensated thermo-balance with interchangeable furnace units was shown by Stanton Instruments, Oxford Street, London, W.1

The problem of measuring the atmospheric humidity in small spaces or crevices which is an aspect of the greater problem of humidity in storage and consequent pest infestation was dealt with on the stand of THE TINTOMETER, LTD., Waterloo Road, Salisbury, Wilts. The method demonstrated showed the

use of specially prepared cobalt thiocyanate papers and permanent colour standards against which the colour changes in those papers can be assessed. The staff of The Tintometer, Ltd., has collaborated with Mr. M. E. Solomon collaborated with Mr. M. E. Solomon of the Department of Scientific and Industrial Research, Pest Infestation Laboratory, to produce permanent colour standards for use with the Lovipermanent bond comparator, and suitable papers impregnated with cobalt thiocyanate have been produced by The British

Drug Houses, Ltd.
A prototype of a drop detector to detect drops and provide impulses to operate a counter at a maximum rate of 300 drops a minute was shown by J. W. Towers & Co., Ltd., Victoria House, Widnes, Lancs. An improved automatic direct-reading balance (model 210) was shown by that company. The new balance is fitted with a number of modifications including an improved graticule which gives a clearer and more brilliant image on the screen. The same company demonstrated a fully enterprise approximation of the same company demonstrated as fully enterprise approximation of the same company demonstrated as the same company demonstra fully automatic counter-current apparawhich comprises a robot unit coupled to stand units carrying up to 200 all-glass counter-current tubes.

A development of the X27 thermostat bath, the X27 major, was shown by Townson & Mercer, Ltd., Croydon, Surrey. The bath is equipped with a new straight line method of circulation and the depth has been increased to take the new types of specialised viscometers. Also shown by that company were moulded polythene diaphragm burette taps. The taps employ a plastic diaphragm, giving a delicate control. The ends of the taps are moulded to an exact taper and tapered glass inserts are supplied which give a true liquid-tight joint and enable the tap to be joined to other glass apparatus. Another exhibit by the company was a flexible glove cabinet for the handling of materials under controlled conditions as in aseptic work. The cabinet is entirely constructed of PVC, fastening with special PVC zip fasteners. A separate air lock chamber is provided. The cabinet is maintained at a small positive pressure to keep its shape and that is done by feeding in an inert gas or sterile air, any leakage acting

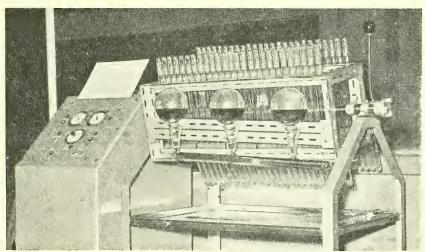

Moulded plastic burette tap (Townson & Mercer, Ltd.).

as ventilation. A prototype of an oven with a maximum temperature of 400° C. was also shown. Of special interest to pharmaceutical manufacturers was a vacuum moisture tester which should be available in 1958. In that instrument a 5-gm, sample is weighed on a torsion balance contained in a vacuum chamber which can be opened to place the sample on the pan. When the balance indicator shows zero the correct weight of sample has been added. The container is then closed and vacuum applied while a powerful beam of infrared light is focused on the sample. The moisture evaporates off at a lower temperature than would be possible in air thereby reducing errors caused by overheating of the sample and there is complete freedom from errors caused by convection currents. The percentage moisture is read directly from a large dial graduated to 0.1 per cent.

The SP900 flame photometer was

shown by UNICORN INSTRUMENTS, LTD., Arbury Works, Cambridge A produc-tion model, it differs considerably from the prototype shown in 1956.

Automatic counter-current apparatus (J. W. Towers & Co., Ltd.).

MOVEMENTS, January to March SHARE

USINESS and interest in the industrial department of the London Stock Exchange during the first quarter of 1957 were greatly influenced by the labour situation. They were still probably on a larger scale than in the fourth quarter of 1956. Drug company shares made a good showing, with a number of moves appreciably in favour of holders recorded.

Timothy Whites & Taylors 5s., for example, closed nearly 6s. higher at 28s. 9d., after having been dealt in up to a new high level of 29s. 1½d. Firmness was also evident in Albright & Wilson 5s., which finished nearly 2s. better at 20s., and in The British Drug Houses 5s., which closed in holders' favour by about 1s. 9d., at 14s. 9d.

Boots Pure Drug 5s. closed fractionally lower at 15s. 3d. Greeff Chemical Holdings 5s., on the other hand, finished nearly 2s. 6d. in favour of holders at 18s. 3d., or within ninepence of their highest level since the beginning of

Reckitt & Colman Holdings £1 continued to be a centre of regular business and closed 1s. 6d, better at 44s., after having gone down to 40s. 9d, in the meantime. Business was done practically every day in Borax (Holdings), 5s. Deferred, which have been transferred in their new 5s. form since about the beginning of the year. They closed 1s. 3d. down at 24s. 6d. after sinking to 22s. $10\frac{1}{2}$ d. in the meantime.

Aspro-Nicholas 5s. were valued fractionally lower at 13s. and thus failed to recover any of the 2s. odd loss which they recorded during the fourth quarter of 1956. Beecham Group 5s. finished just over one shilling better at 19s. 6d.; Evans Medical Supplies 5s, closed 9d, better at 6s.; and Cussons Sons & Co. 2s. shares were valued at about one shilling higher at 6s. $4\frac{1}{2}$ d.

In the low-priced share section, Ashe Chemical 1s. were priced 3½d, higher than previously at 1s. 2d., while Dufay 2s. were twopence lower at 1s. 3d.

In the Preference share section the adverse trend of the previous six months was reversed, practically all moves being in favour of holders.

WORLD TRADE

India's New Coinage.—India switched to decimal coinage on April 1. Hitherto the rupee was divided into 16 annas and each anna into four pice, or twelve pies. The new unit is the naya paisa (new pice), 100 of which equals one rupee. The adoption of the decimal coinage precedes a change over to the metric system of weights and measures, expected to start in 1958.

Australia Relaxes Import Restrictions.—Australia is to relax her import restrictions in the next financial year by allowing an extra A£75 millions worth of goods into the country immediately and aims at abolishing all restrictions as soon as possible. All quotas in category B, which covers mainly consumer goods, are to be increased by $66\frac{2}{3}$ per cent. of their present value and accounts for about A£20 millions of the A£75 millions relaxa-Category A quotas for congoods (includes medicinal sumer preparations) are also being substantially increased. Those quotas are already generally at a higher level than quotas for category B goods and the increase in quotas in practically all cases is 20 per cent. of their present value and should account for A£10 millions of the increase. The licensing period is unaltered.

OSTERMILK

TRADE MARK

No. 1 Fat-modified; No. 2 Full-cream; both containing added iron and vitamin D. In 1 lb. tins. Face price 3/9; Trade price 40/- per dozen, special parcel terms available

GLAXO LABORATORIES LTD., GREENFORD, MIDDLESEX. BYRon 3434

WARD, CASSENNE LIMITED,

a new British
pharmaceutical
company closely
associated with the
development of
corticoids, present to
the pharmaceutical
profession:—

DELTALONE

buffered tablets, brand of prednisone. In bottles of 30 tablets of 1 mg. at $9/4\frac{1}{2}d$. plus Purchase Tax $2/9\frac{3}{4}d$. or 5 mg. at 37/6d. plus Purchase Tax 11/3d.

HYDRODELTALONE

tablets, brand of prednisolone.

In bottles of 30 tablets of 1 mg. at $9/4\frac{1}{2}$ d. or 5 mg. at 37/6d.

In bottles of 500 tablets of 5 mg. at 580/-.

HYDRODELTALONE OINTMENT with NEOMYCIN

for topical application in tubes of 5 g. at 8/6d. each or 15 g. at 21/- each.

HYDRODELTALONE EYE OINTMENT

in tubes of 3 g. at 4/- each

HYDRODELTALONE EYE DROPS

in bottles of 3 ml. at 4/6d. each

HYDRODELTALONE INTRA-SYNOVIAL INJECTION

in 5 ml. vials at 35/- each

No Purchase Tax on all Hydrodeltalone preparations

COACTYL

buffered tablets, a combination of prednisone and acetylsalicylic acid.

In bottles of 50 tablets at 12/-plus Purchase Tax $3/7\frac{1}{2}$ d.

All available under N.H.S. prescription.

WARD, CASSENNE LTD., 116 Victoria Street, London, S.W.1 WARD, CASSENNE have informed the medical profession of these fine new ethicals by frequent mailings of brochures and extensive announcements, many in colour, in the most important medical journals.

Orders may be placed with the Sole Distributors:

Messrs. Fassett & Johnson Ltd., 86 Clerkenwell Road,

London, E.C.1, or with your wholesaler.

TRADE REPORT

The prices given are those obtained by importers or manufacturers for bulk quantities or original packages. Various charges have to be added whereby values are in many instances augmented before wholesale dealers receive the goods into stock. Crude drugs and essential oils vary greatly in quality and higher prices are charged for selected qualities.

London, April 3: Business in the spot market for Crude Drugs continued at routine levels during the week, with prices a shade easier for a few commodities.

GINGER continued to fall as new-crop Jamaican material became more freely available and buyers held o'f Jamaican No. 3 ginger forward was down 30s. a cwt. against the previous week and African lost 10s. a cwt. on the spot. IPECACUANHA remained scarce with virtually nothing offering on the spot. Honey is a weak market at present through lack of demand and holders have reduced their quotations by about 10s. a cwt. QUILLAIA for shipment could be bought at 5s. per cwt. under its previous value. In AROMATIC but Dutch Caraway lost a further 2s. 6d. per cwt. The prices of most Waxes were maintained but fatty-grey CARNAUBA was marked up 20s. per cwt. on the spot upon higher advices from

There were no changes in PHARMA-CEUTICAL and FINE CHEMICALS and only minor alterations among ESSENTIAL OILS. LEMONGRASS was easier on the spot as near-afloat parcels were being freely offered. Reports from origin, however, spoke of a firmer tone in the new crop prices. Chinese PEPPERMINT was lower by sixpence per lb. on the spot and Formosan CITRONELLA for shipment eased by a similar amount.

Pharmaceutical Chemicals

ADRENALINE. — Rates for synthetic B.P. are from 1s. 1d. (500-gm. lots) to 1s. 6d. (10-gm.) per gm. and ACID TARTRATE, B.P., from 9d. to 1s.

Ammonium acetate. — 1-cwt. lots B.P.C. are quoted at 3s. 9d. per lb. 1-cwt, lots of

AMMONIUM BICARBONATE. — The B.P. powder is £50 5s. per ton; CARBONATE is £81 10s. for lump and £85 10s. for powder, all delivered terms.

Ammonium chloride, B.P. — Makers quote 1-cwt. lots at 68s.

Aneurine hydrochloride. — Price per kilo is £19 2s, 6d, with 10-kilo lots at £18 17s. 6d, per kilo,

ASCORBIC ACID. — Rates per kilo: 1 kilo, £4 18s.; 10 kilos, £4 16s. Sodium ASCORBATE is offered at the same prices.

CITRIC ACID.—Quotations (per cwt.) for domestic material are 215s, for 1-4-cwt. lots and 210s, for 5-cwt, lots.

CYANOCOBALAMIN. — Less than 10 gm. lots are £87 10s. per gm.

DICOPHANE (DDT).—Prices are as fol-ws:—1-cwt. lots, 3s. 2d. per lb.; 1-ton, 2s. 11d.

DIPHENAN.—Prices range from 55s. 3d. (56-lb.) to 63s. (1-lb.) per lb.

EMETINE.—Price for 32-oz, lots of the HYDROCHLORIDE is 245s, per oz. The BISMUTH 10DIDE is 115s, per oz.

EPHEDRINE.—In 100-oz. lots alkaloid is nominally 7s. per oz.; sulphate, 4s. 3d. and hydrochloride, 3s. 10½d, per oz.

ERGOTOXINE ETHANESULPHONATE. — Price per gm. for B.P.C. (1949) is: 1 gm., 168s. 9d.; 10 gm., 155s. 3d.

FOLIC ACID.—B.P. and U.S.P. is offered at 4s. 8d. per gm. in 1-kilo lots.

FORMALDEHYDE. — B.P. solution in 1-4 drum lots is £39 15s, per ton; 5 drum lots are £38 15s, per ton, all including free drums.

Magnesium peroxide.—Price (per lb.) for 1-cwt. lots of B.P.C. (15 per cent.) is

MAGNESIUM SULPHATE.—Quotations for B.P. in minimum 1-ton loss vary octile £17 10s, and £21 per ton according to size of crystal and manufacturer. Exsiccated

MENAPHTHONE.—B.P. is £11 per kilo; ACETOMENAPHTHONE, B.P., £11; WATER-SOL-UBLE (menadione sodium bisulphite, UBLE (menadione U.S.P.), £15 per kilo.

NICOTINAMIDE. — Prices per kilo are now: 1 kilo, 92s. 6d.; 10 kilos, 90s., 50 kilos, 88s. 6d.

NICOTINIC ACID. — Prices per kilo are 57s. 6d. for 1-kilo and 53s. 6d. for 50-kilo

Nikethamide. - Prices per kilo are:-1-kilo, 113s.; 50-kilo, 105s.

OXALIC ACID.—Manufacturers' rates for 1-ton lots are from £129 per ton, delivered.

POTASSIUM BROMATE.—In 5-cwt. lots the price is 5s. 3d. per lb.

POTASSIUM HYDROXIDE.—B.P. sticks are from 6s, 6d. per lb.; technical, flake, ls. 4d.

POTASSIUM 8-HYDROXYQUINOLINE PHATE.—1 kilo is 47s. 1d. and 50 kilos, 44s. per kilo.

PYRIDOXINE. . - Manufacturers' rate for 1-10 kilos is £135 10s, per kilo.

RIBOFLAVINE. — Price (per kilo) is £24 17s, 6d, for 1-kilo and £24 15s, for 10-kilo lots.

Salicin.—Quoted at 18s. 6d. per oz.

Sodium bromate.—1-cwt. lots are quoted at 9s, 9d. per lb.

SODIUM CARBONATE. - B.P. exsiccated is 60s, 6d. per cwt.

SODIUM CHLORIDE. — Re-crystallised is 30s. per cwt.

SODIUM PERBORATE. — Prices (per cwt.) are 145s. 9d. in 1-cwt. kegs; 138s. 3d. in 1-cwt. bags for B.P.C. (minimum 10 per cent. available oxygen). Other strengths pro rata. The PERBORATE MONOHYDRATE testing 15 per cent. available oxygen is 309s, 9d. per cwt.

SODIUM PERCARBONATE. — Prices (per cwt.) about 166s, 9d, (bags, 7s, 6d, lower) for minimum 12½ per cent. available

SODIUM PHOSPHATE. — B.P. powder is 125s. per cwt.

SODIUM SALICYLATE.—Rates are now:—1-ton lots in bulk, 3s. 7d. per lb.; 5-cwt., 3s. 8d.; 1-cwt., 3s. 10d.

SODIUM SULPHATE. — Makers' prices for B.P. range from £11 10s. to £18 17s. 6d. per ton as to crystal and quantity, ex works.

VITAMIN A. — Synthetic: Supplied in strengths of 200,000 international units per gm, the price is 11¼d, per million i.u. Natural is 1s. 4d, per million units.

VITAMIN D2. — In oil, 2 million units per gm. the price is 2d. per million international units. Crystalline see under calciferol. D2, 2d. per million units in oil; crystalline, 17s. per gm.

VITAMIN E (synthetic). — TOCOPHERYL ACETATE, B.P.C., 10 gm. to 100 gm., 1s. 2d. per gm.; 100 gm. to 1 kilo, 1s. per gm.; 1 kilo and under 10 kilos, £45 per kilo; 10 kilos, £44 15s. per kilo.

Crude Drugs

ACONITE. — Spot supplies of Spanish napellus are 3s. 3d. per lb., duty paid.

AGAR.—Kobé is from 13s. to 16s. per lb., duty paid as to quality. March-April shipment, 11s., c.i.f.

ALOES. — Cape prime for shipment is 328s. per cwt., c.i.f.; and spot 350s. Curação for April-May shipment is quoted at 390s., c.i.f.

Aniseed (star).—Chinese is 137s. 6d. per cwt., c.i.f., for afloat. Spot is about 150s

BALSAMS.—Quotations (per lb.) are:—Canada: Spot value 30s. Copaiba, Para is from 7s. 9d. to 11s., duty paid. Peru, 10s., duty paid. Tolu (genuine as imported), 26s.; B.P., 17s. 6d., spot.

BENZOIN.—Sumatra block on the spot is from £25 to £30 per cwt. No. 1 for shipment is £23 5s., c.i.f. Almonds, 15s. per lb., c.i.f.

CARDAMOMS. — Aleppy greens on the spot are 15s. 6d. per lb. and shipment, 14s. 9d., c.i.f. No. 1 seed, 22s. per lb.

Cascara sagrada. — American 1955 peel is 345s. per cwt., duty paid. 1956 processed peel for shipment, 300s., c.i.f.

CASCARILLA.—Spot market bare of whole cut bark. No shipment offers.

CASSIA BARK. — Whole on the spot is now quoted at 120s. per cwt., in bond, with forward offers still unobtainable. Broken, 110s., in bond, and shipment, 10s. 105s., c.i.f.

CINNAMON.—Ceylon for shipment (c.i.f.) per lb., OOOO, 8s. 6d.; seconds, 6s. 4½d.; featherings, 2s. 8d.; quillings, 4s. 8d.;

CLOVES. — Zanzibar on the spot are quoted at 3s. 8d. per lb. Shipment, $3s. 5\frac{1}{2}d., c.i.f.$

COCHINEAL. — Silver-grey Peruvian, 14s, 6d. per lb. Canary Isles black-brilliant, 28s, 6d.

DIGITALIS LEAF.—Purpurea is offered at 1s. 3d. per 1b., c.i.f.

ERGOT. — Portuguese is 6s. per 1b., c.i.f., for prompt shipment and 7s. 3d., spot. American, 7s. 3d., c.i.f. Bulgarian, 9s. 6d.; Hungarian defatted, 13s. 6d., spot.

GENTIAN. — Spot: French, 185s. per cwt.; Spanish, 165s.; Jugo-Slavian, 155s.

GINGER. — African on the spot is 180s, per cwt. and April-May shipment, 165s., c.i.f. Jamaican No. 3 spot, 530s, April-May shipment is 440s., c.i.f. Cochin for April-May shipment, 112s. 6d. per cwt. c.i.f. cwt., c.i.f.

Gum Acacia. — Kordofan cleaned sorts are 155s, per cwt. on the spot; affoat, 137s. 6d., c.i.f.

HONEY. — Australian light-amber is 135s. to 140s. and medium-amber, 127s. 6d. to 132s. 6d. Argentine, 135s. to 137s. 6d.; Jamaican, 147s. 6d. to 152s. 6d., all per cwt., on the spot.

IPECACUANHA. — Spot cleared. Shipment: Matto Grosso, 49s., c.i.f.; Costa Rican, 55s., c.i.f.

JALAP ROOT. — Mexican testing 16.2 per cent, is offered at 5s, 6d, per lb, on the

KARAYA.—No. 1 gum on the spot is now quoted at 270s, per cwt, and No. 2 at

Kola nurs. — Jamaican are offered at about 8d. per 1b., spot, and 6½d., c.i.f. African, 5½d.

LIQUORICE. — Natural root: is 46s. 6d. per cwt. Russian, 48s. 6d. spot and 47s., c.i.f. Block juice: Anatolian, 200s. per cwt.; Chinese and British, 195s. on the spot. Italian stick from 310s. to 476s. per cwt. Spray-dried extract, 2s. 9d. per lb.

LOBELIA HERB. — Spot offers are from 7s, to 7s, 6d, per lb.

MACE. — Whole on the spot is 25s. per

MENTHOL.—Chinese. Spot is 51s. per Histriot.—Chinese. Spot is 31s. per lb., duty paid; afloat, from 48s. to 48s. 6d., c.i.f., as to position. Brazilian, spot, 42s. 6d., duty paid; shipment, 39s. 6d., c.i.f.

Nutmegs. — West Indian 80's not quoted; sound unassorted, 14s. 3d. per lb.; wormy and broken, 9s. 6d.

ORANGE PEEL. — West Indian bitter quarters are 11d. to 1s. per lb.; Spanish 1s. to 1s. 3d.; thin-cut Tripoli, 2s. 3d.

Papain.—Scarce. East African grade 2 is 28s. per lb., spot; No. 1 nominally 32s. 6d. per lb.

UNITED STATES REPORT

NEW YORK, APRIL 2: Export inquiry continued fairly active for CAUSTIC SODA and SODA ASH with most of the interest coming from countries that ordinarily depend on Great Britain for material. Despite the recent advance in synthetic laevo MENTHOL the natural product from Brazil eased off five cents to \$6.15 a lb. COPAIBA BALSAM weakened to 55 cents a lb., down five cents as lower offerings from Brazil were reported. DIGITALIS LEAVES were unchanged at \$1.20 a lb. with supplies ample and demand normal. Higher per lb. among Essential Oils was Sandalwood at \$15.80 (up 50 cents); Lower were GINGER at \$18.50 (down \$3), and GRAPEFRUIT OIL at \$1.50, down 10 cents. PIMENTO LEAF at \$2.65 was five cents down.

LANOXIN

THE **NEW** NAME FOR THE ORIGINAL

DIGOXIIN

When we discovered Digoxin in 1930 we used no other name to distinguish it. In those days, there was but one Digoxin—that issued by B.W. & Co. Today, it has become necessary to provide prescriber, pharmacist and patient throughout the world with that safeguard which a trade mark imposes . . .

THAT TRADE MARK IS 'LANOXIN'

NEW TITLE

- 'Tabloid' BRAND Digoxin BECOMES
- 'Lanoxin' Digoxin, B.P. (compressed)
 Solution of Digoxin 'B.W. & Co.' BECOMES
- 'Lanoxin' BRAND Digoxin Oral Solution

NEW PRODUCTS

- 'Lanoxin' BAND Injection (for intramuscular or intravenous injection). Boxes of 6 × 2 c.c. ampoules, each containing 0.5 mgm.
- Lanoxin Digoxin Pædiatric Elixir
 Bottles of 2 fl. oz., containing 0.05 mgm. per c.c.

NO CHANGE OF TITLE

- 'Wellcome' Injection of Digoxin
- 'Wellcome' Sterile Alcoholic Solution of Digoxin

N.B. Whenever oral Digoxin is ordered 'Lanoxin' may be dispensed

Look at this dressing!

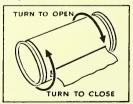

... It is STERAID GAUZE being drawn out of its patent container ready to be snipped off.

What a convenience this could be to your Doctor and other customers: they would readily buy their Dressings in this simple and effective device . . . so very much superior to the ordinary packets.

STERAID DRESSINGS are made up in Gauze and Lint (Plain and Boric) in Display outers, each of twelve containers.

Enter a trial order through your Wholesaler. Your customers will appreciate the utility of this excellent product.

After use, one slight turn at the base will return the dressing to the container, enclosing it completely from any contamination, ready for further use...

Mantage.

There is one line with which you can reduce the odds in the annual gamble with the English summer . . . the famous range of SUBA SEAL BATHING CAPS, styled and made in rubber for EXCLUSIVE SALE BY CHEMISTS by the firm that produces the renowned hot water bottle.

SUBA-SEAL BATHING CAPS appeal to the ardent all-the-year-round swimmer by their efficiency, being perfectly water tight and comfortable to wear, and they have a special appeal to the woman who seeks to top a smart beach outfit with an attractive cap. There is a choice of design motif embossed in the rubber, and the sleek streamlined shape follows closely the natural contours of the head. Add to this the variety of colours available in the Ladies' and Children's caps, Red, White, Pastel Blue and Pastel Green and the range of fittings from Junior to Adult and it will be apparent that it is no plunge to stock SUBA-SEAL but a calculated move to secure a share in summer sales.

Folding MANUALLY OPERATED Fixed

This is the Pharmaceutical Bulk Blending Device 'par excellence.'
Unlike any other Mixing Device the "Flexiblender" uses the principle of reciprocal displacement within a fluid bulk, to produce the high degree of turbulence required for uniform mixing.

Will function within a W/M Winchester.

It eliminates centrifugal separation due to liquid rotation. (An unavoidable concomitant of all rotary liquid mixing.)

Its balanced design ensures that practically all input energy is converted into turbulent (i.e., true) mixing.

Filled containers are uniformly mixed by Flexiblending;

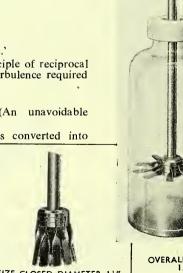

an impossible feat by any shaking process.

By mutual arrangement the "Flexiblender" Turbulent Mixer is now available for use with the 'Skylon' Series of Polythene Carboys, all sizes.

products in so many industries is a story of research and experiment which goes back more than a hundred years. Today, every product made by the company is backed by a research organisation whose facilities include chemical, physical, spectrographic, and rubber compounding laboratories which are constantly dealing with new problems in almost every field of industry.

This experienced background is available to any manufacturer who requires information on the performance of any of our products in test formulae. Information in the form of technical bulletins is available on request.

The 'COMMON COLD'

-a new approach

DILACOL TRADE MARK

DILACOL reverses the previously favoured method of symptomatically treating the common cold with a vasoconstrictor. Instead, DILACOL has as one of its principal ingredients a powerful **vasodilator** in the form of 'Perdilatal' (used in the treatment of peripheral vascular diseases).

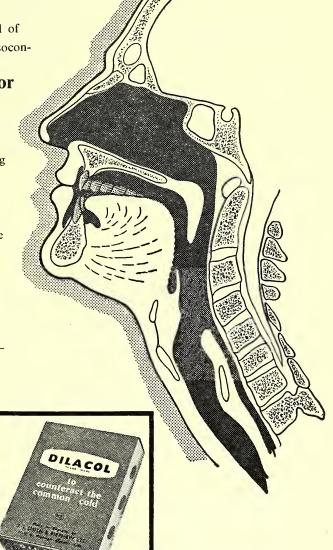

The administration of this vasodilating substance increases vascularity of the nasal mucosa, thus leading to a more copious secretion followed by a rapid relief of the symptoms—as opposed to a mere "drying-up" of the vessels.

DILACOL is in category 4 and therefore prescribable under N.H.S. It may, however, be bought over the counter without prescription.

This time of the year shows increasing turnover in products designed to counteract the common cold. By recommending this new way of counteracting "colds" you will have return business—as well as the thanks of your customer.

The 'Blue Star' Success Story

Southalls 'Blue Star' — the sanitary towel "designed by women for themselves" — has been the greatest success since Southalls 'Original', sixty years ago.

Women have found they can trust its perfect cut . . . its layers of super-absorbent cellulose tissue in softest cotton-wool . . . its protective backing, for extra security.

Now — again in consultation with a consumer panel of women — 'Blue Star' has been given a soft knitted cover, with firmly-stitched loops . . . final perfection in comfort and appearance.

. and now at a truly competitive price!

The new 'Blue Star' will soon be advertised nationally. Make sure your stocks are sufficient! Ask our representative for details of new lower prices, also new point-of-sale material!

Evan Williams

FOR ALL TYPES, ALL COLOURS AND ALL CONDITIONS OF HAIR a new liquid shampoo in a clear eye-catching sachet

Hi-Glo is completely new. It contains Dyroxin, an ingredient which, to quote the laboratory report, is "particularly effective for imparting highlights to the hair." Dyroxin is exclusive to Evan Williams Hi-Glo, and gives it a startling advantage over all other shampoos.

Hi-Glo will be heavily advertised in the Daily Mirror, the Woman's Sunday Mirror, Woman, Woman's

Own and other leading women's periodicals beginning May.

Hi-Glo is packed in a particularly attractive display carton containing three dozen.

Hi-Glo

PER LARGE SACHET

LIQUID LANOLIN SHAMPOO SACHETS TAKEN IN PART EXCHANGE

To clear the way for the new Hi-Gio, the paper sachet pack (not the bottles) of the Evan Williams Liquid Lanolin shampoo will be eventually withdrawn. Credit will be given in full for all Liquid Lanolin paper sachets returned with orders for Hi-Glo received in April. Credits cannot be approved after April 30. The trade is being notified of the details of this plan. If you do not receive them please write.

Make sure you're ready when the advertising breaks!

Facts his doctor

wasn't told...

Retired for the last three years, the patient complains that he's unable to keep pace with his gentle present-day routine. 'Says he's always tired . . . can't understand it as he's always been so active for his age. He doesn't say however that since his wife died, he's lost interest in his food . . . his attention to diet has been lacking and regular meals have been replaced by casual snacks.

GEVRAL Geriatric Vitamin—Mineral Supplement was evolved to enable doctors to treat just such patients—to provide a balanced ration of essential nutrients in the simplest form. The usual dosage is one capsule daily—and the Gevral formula is so comprehensive that this routine provides effective allround supplementation. Indeed, for many elderly patients the result is a gratifying return of general well-being —and the rediscovery that life is worth living!
